Czechia

1. COUNTRY HIGHLIGHTS

Just over seven in ten respondents in Czechia consider climate change to be a 'very serious' problem (71% vs the EU average of 79%), an increase of 14 percentage points (pp) since 2017. Moreover, the proportion who see it as the single most serious problem facing the world has almost doubled, with an increase of nine pp to 15%, though remains below the EU average of 23%.

More than four in ten (45%, well below the EU average of 60%) say they have taken personal action to fight climate change in the past six months. However, when given specific examples of climate actions, this rises to 94% (just above the EU average of 93%).

- More than three quarters (76%) say they try to reduce waste and regularly separate it for recycling, above the EU average of 75%.

- Moreover, since 2017, there has been a ten pp increase in the proportion of respondents who take lower energy consumption into account when buying household appliances (51% vs the EU average of 48%).

More than half of respondents agree that taking action on climate change will lead to innovation and increased competitiveness of EU companies (63% vs the EU average of 79%), that reducing fossil fuel imports can increase energy security and benefit the EU economically (57% vs the EU average of 72%) and that more public financial support should be given to the transition to clean energies (74% vs the EU average of 84%).

The proportion who agree that adapting to the adverse impacts of climate change can have positive outcomes for citizens is 52%, (vs EU average of 70%).

A large majority of respondents in Czechia agree that their national government should set ambitious targets to increase renewable energy use (83% vs the EU average 92%) and support increased energy efficiency measures by 2030 (82% vs the EU average of 89%). Most significantly 89%, (a little under the EU average of 92%) agree with the aim of a climate-neutral EU by 2050.

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QB1a Which of the following do you consider to be the single most serious problem facing the world as a whole? (%)

QB1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS) (%)

3. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 2/2

QB2 And how serious a problem do you think climate change is at this moment? Please use a scale from 1 to 10, with '1' meaning it is "not at all a serious problem" and '10' meaning it is "an extremely serious problem".

(%)

- Total 'Not a serious problem' (1-4)
- Total 'A fairly serious problem' (5-6)
- Total 'A very serious problem' (7-10)
- Don't know
