

Conclusions and Recommendations

**5th EU ETS Compliance Conference, Brussels,
6th and 7th November 2014**

General Conclusions

- *Harmonisation of implementation is continuously improving across MS – crucial in ensuring proper implementation of EU ETS*
- *Information exchange between all actors is central (CAs, NABs, verifiers, EA). Has improved in Phase III, but further improvements can be made*
- *Key challenges remain – as described in the breakout sessions*

Conclusions – task forces

- *Task force members appear more willing to be open, share issues and exchange best practice*
 - **However, work of task forces can often fall to a limited number of key individuals**
- *Each task force has identified key challenges going forward*
 - **E.g. improving accessibility and use of guidance, harmonising and improving information exchange, quality of verification reports, IT awareness and needs, effective enforcement in aviation**

Recommendations

- *MS to step up active participation in task forces and stimulate use of outputs by CAs*
- *MS/TFs to continue to improve information exchange between all actors involved*
- *Conference outputs to be incorporated into task force work programmes*
- *Commission to continue work supporting implementation (e.g. update guidance / indexing / Declare / Article 21 e-tool)*

Thank you for your attendance
