European Commission > Climate Action > Policies

PROTECTION OF THE OZONE LAYER AND REDUCING F-GASES

The European Union has a strong commitment to protect the ozone layer and has put in place legislation that is among the strictest and most advanced in the world. The EU has not only implemented what has been agreed under the Montreal Protocol on protecting the ozone layer but has often phased out dangerous substances faster than required. The EU is also concerned about the implications for the climate of highly warming alternatives to ozone depleting substances and has adopted stringent controls to reduce such fluorinated greenhouse gases (F-gases).

OZONE-DEPLETING SUBSTANCES	OZONE-DEPLETING SUBSTANCES	FLUORINATED GREENHOUSE GASES
