

Innovation Fund

Expert Group Meeting

17 December 2020

Agenda

-  10.00 **Welcome**
-  10.05 **Statistics on the applications for the large scale projects call**
-  10.20 **Q&A**
-  10.30 **Results of the questionnaire on the application process – large scale projects call**
-  10.45 **Q&A**
-  11.00 **Linking Member States and applicants**
-  11.10 **Q&A Sli.do Poll**
-  11.20 **Planning of 2021 calls for proposals**
-  11.30 **Q&A Sli.do Poll**
-  12.00 **Closure**

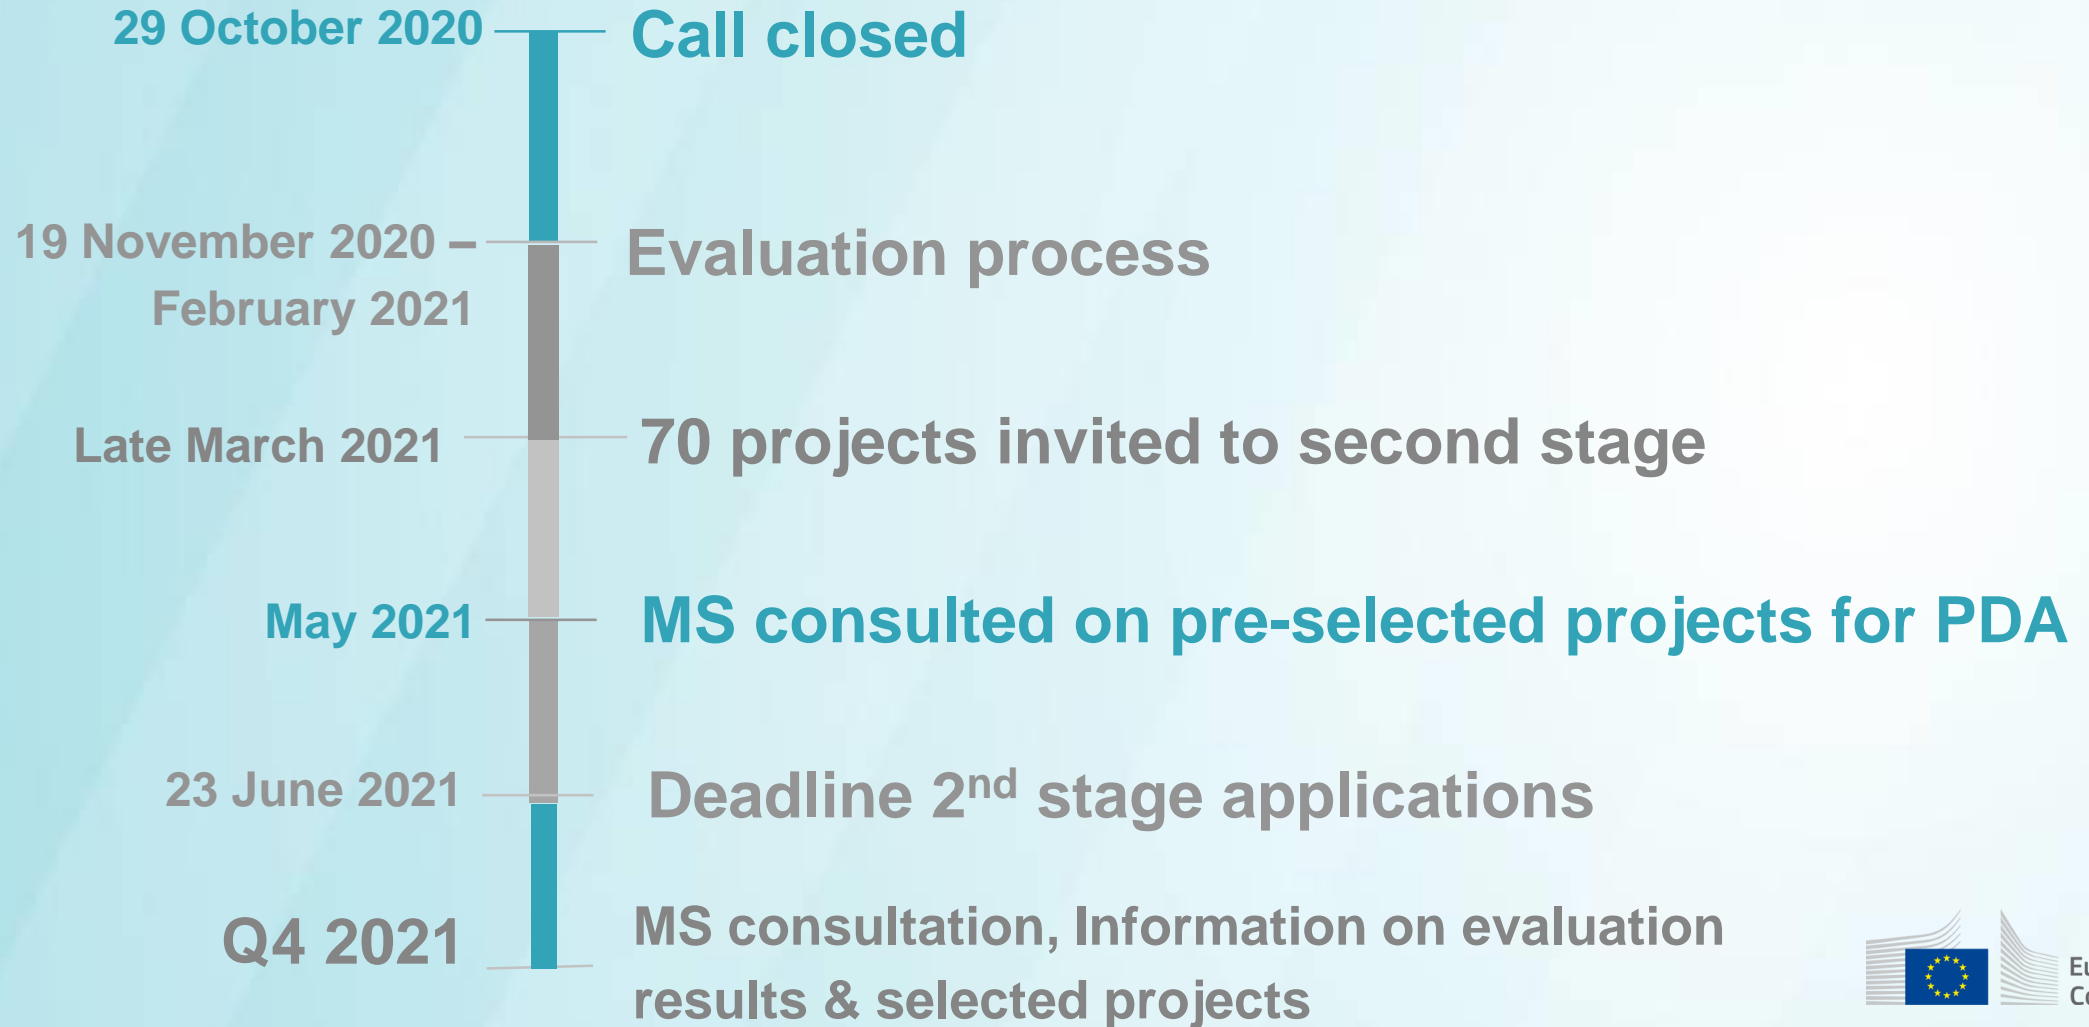

How to... **Slido!**

During the event, you can use Slido to submit your questions and comments

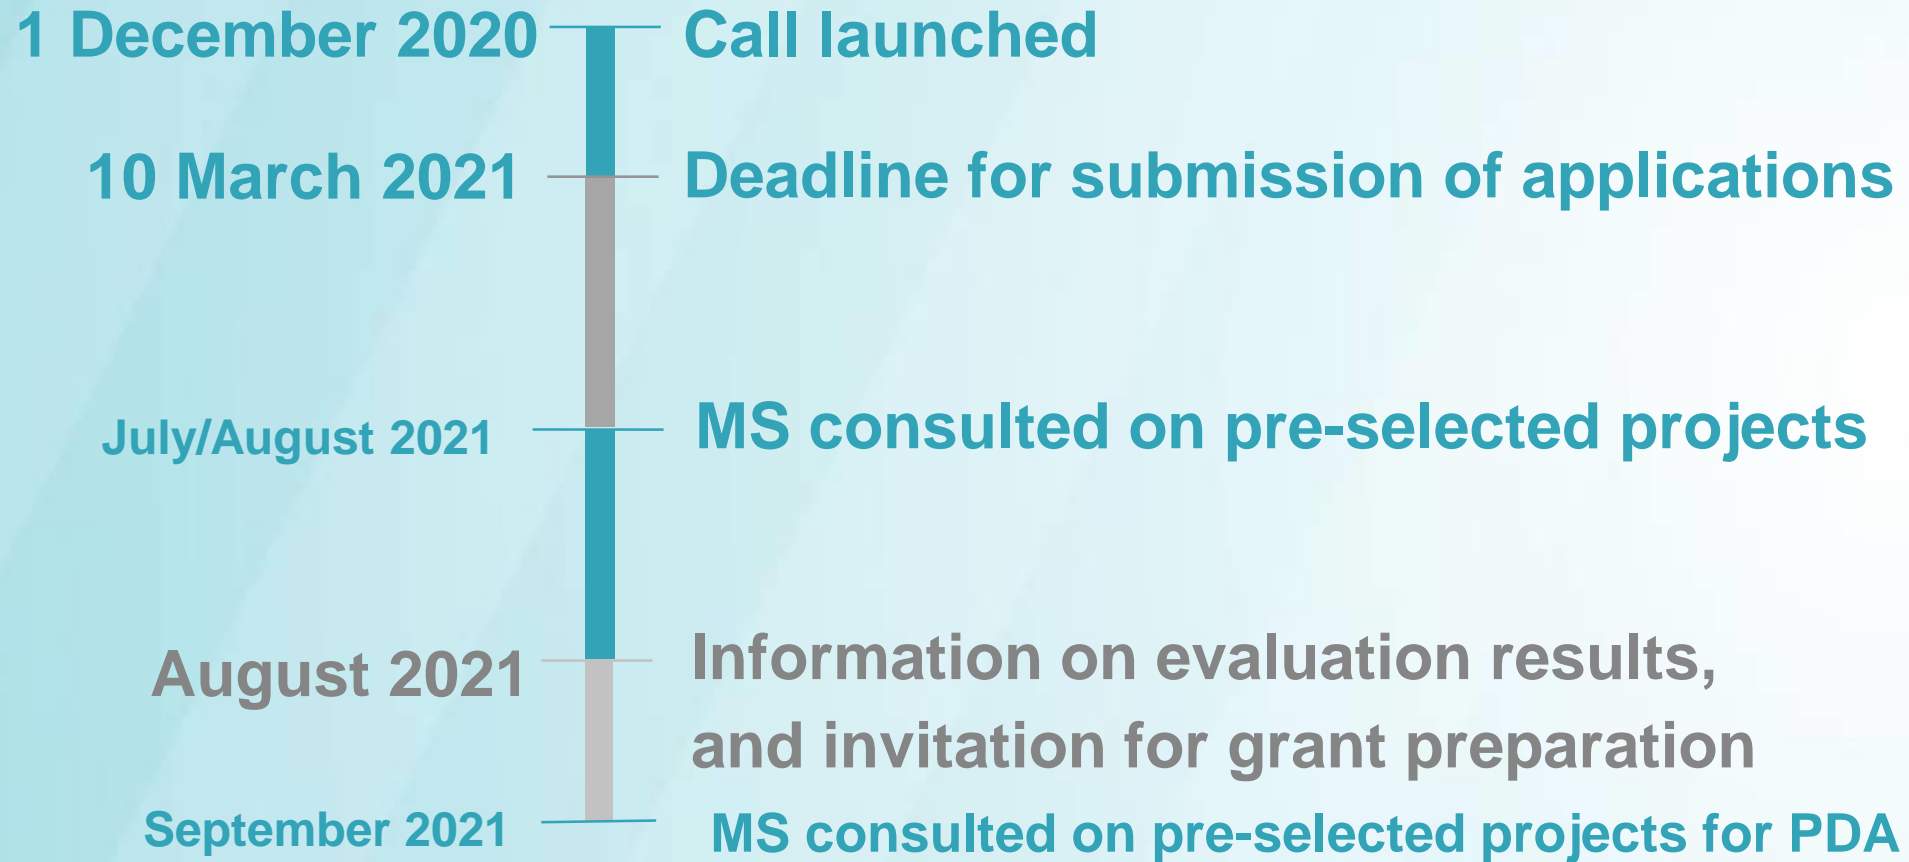

to join

1. **Take out your smartphone, tablet or computer and open your browser**
2. Go to **Slido.com** and enter the event code **#IFEG**.
3. You can now post comments or like comments.
4. Identify yourself when posting comments. These comments will be considered with priority.

Large Scale Call - Progress update & next steps

Small Scale Call - Progress update & next steps

Update of benchmark values for EIs

- Benchmark regulation updated for 2021-2025
- New benchmark values for 52 product benchmarks, heat and fuel
- Currently in public consultation

<https://ec.europa.eu/info/law/better-regulation/have-your-say/initiatives/12792-Commission-Decision-determining-the-benchmarks-values-for-free-allocation-in-the-period-2021-2025>

- To be finalised in February 2021

INNOVATION FUND LARGE SCALE CALL STATISTICS

Status: 16/12/20

311 proposals were submitted requesting in total
€21.7 billion with the potential to avoid **1.2 GtCO₂e.**

ZOOM-IN

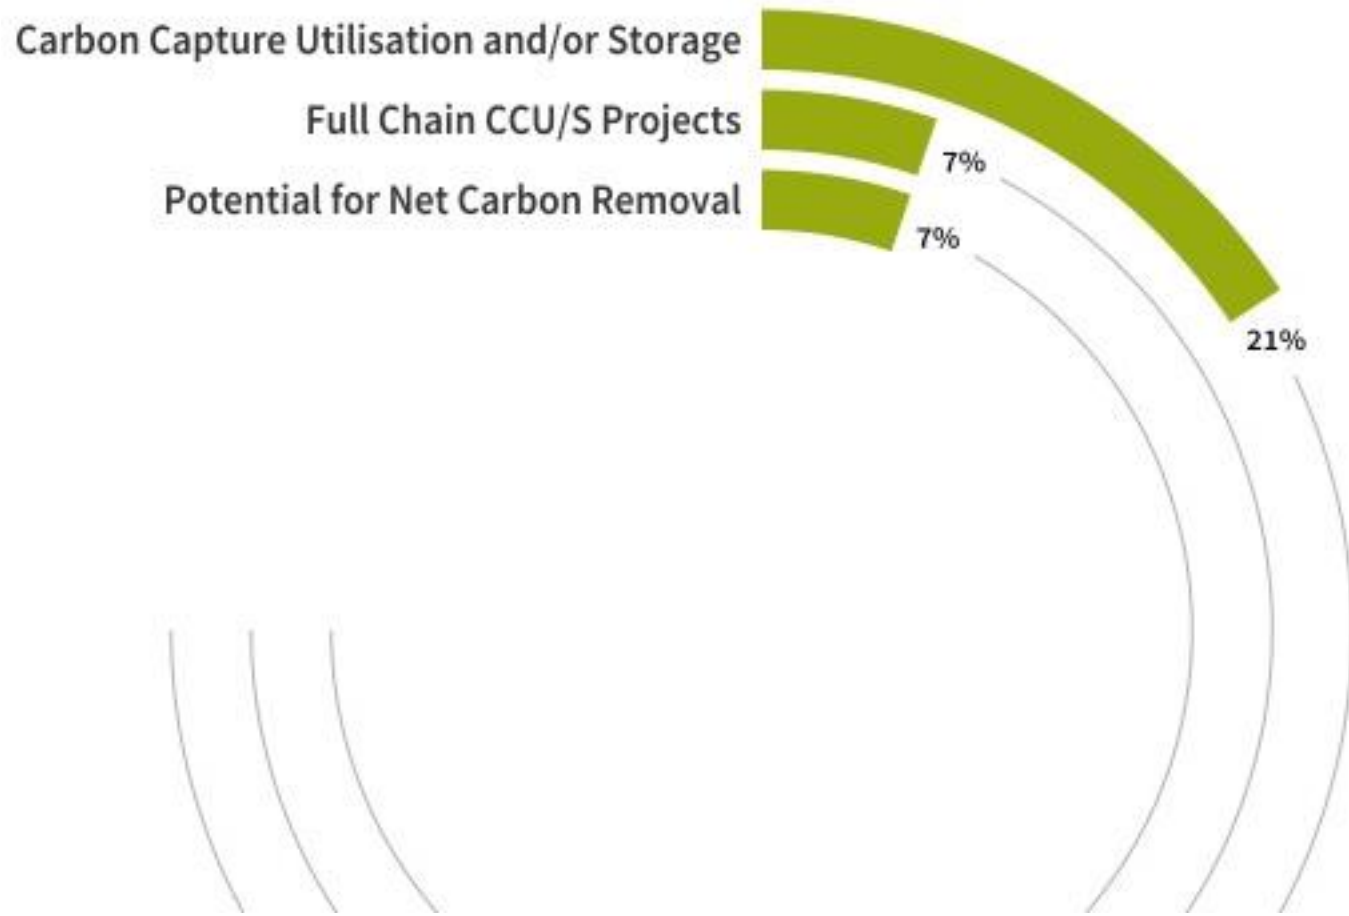

HYDROGEN

Legend: Percentage based on total number of proposals received. High-level screening of applied technological pathways. Classification of projects can be overlapping.

CARBON CAPTURE TECHNOLOGIES

captured from

- biogenic
- steel & cement
- CHP
- chemicals
- refineries
- air
- paper

utilised into

- hydrogen
- fuels
- chemicals
- construction materials

Legend: Percentage based on total number of proposals received. High-level screening of applied technological pathways. Classification of projects can be overlapping.

BIO-BASED PROJECTS

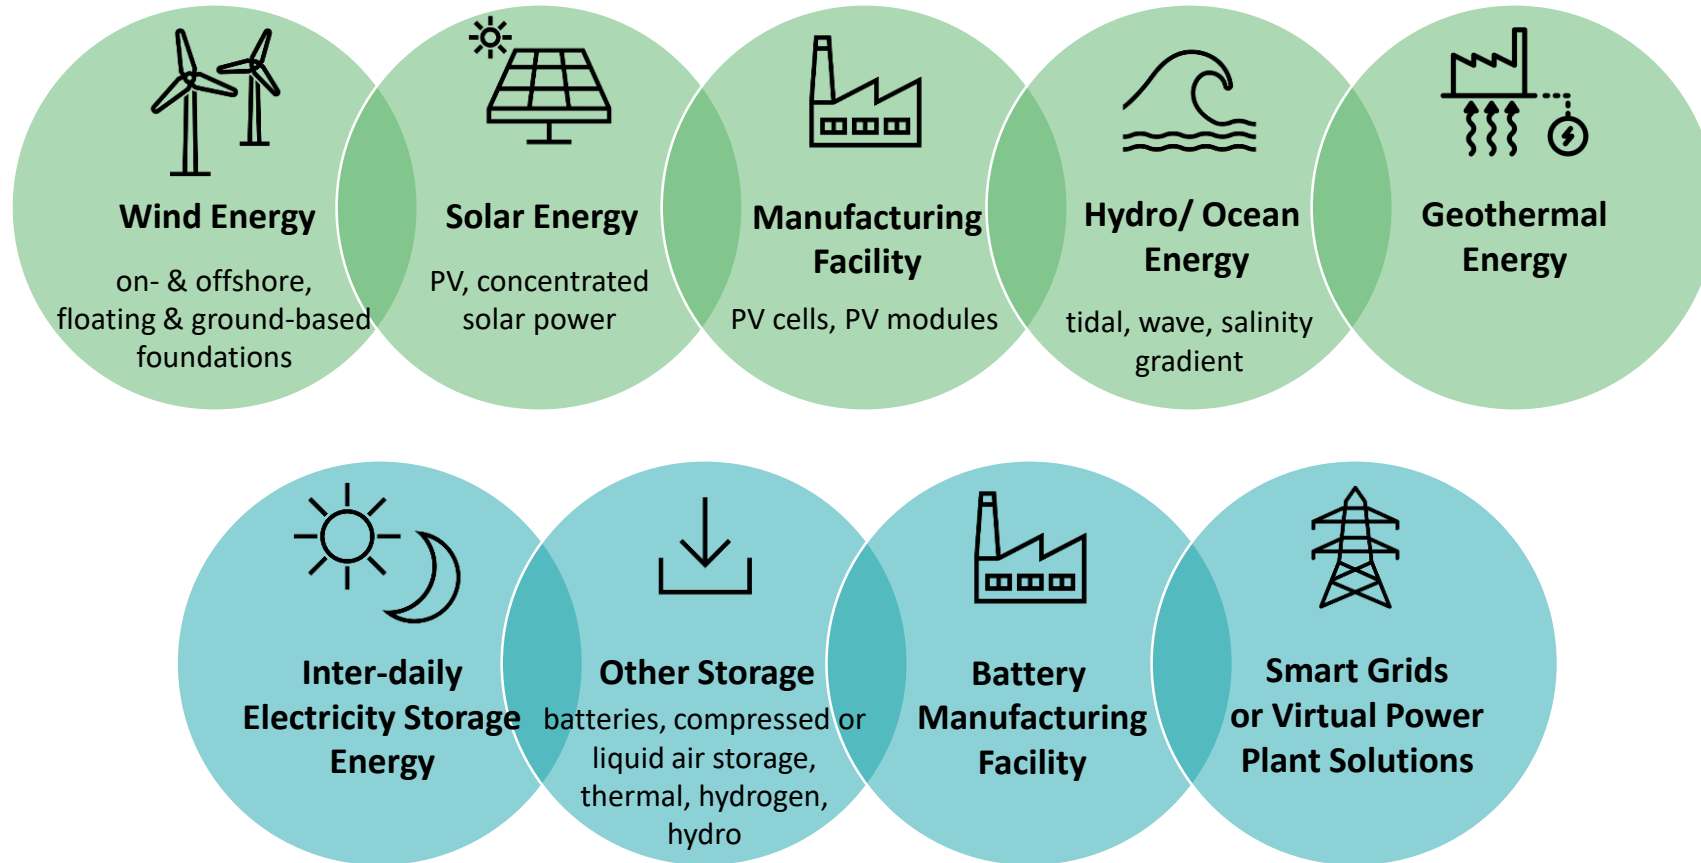

Use of Various Biomass Feedstock
(mostly waste & residues)

- biofuels (e.g. aviation fuel, methanol)
- bio-based chemicals
- electricity & heat

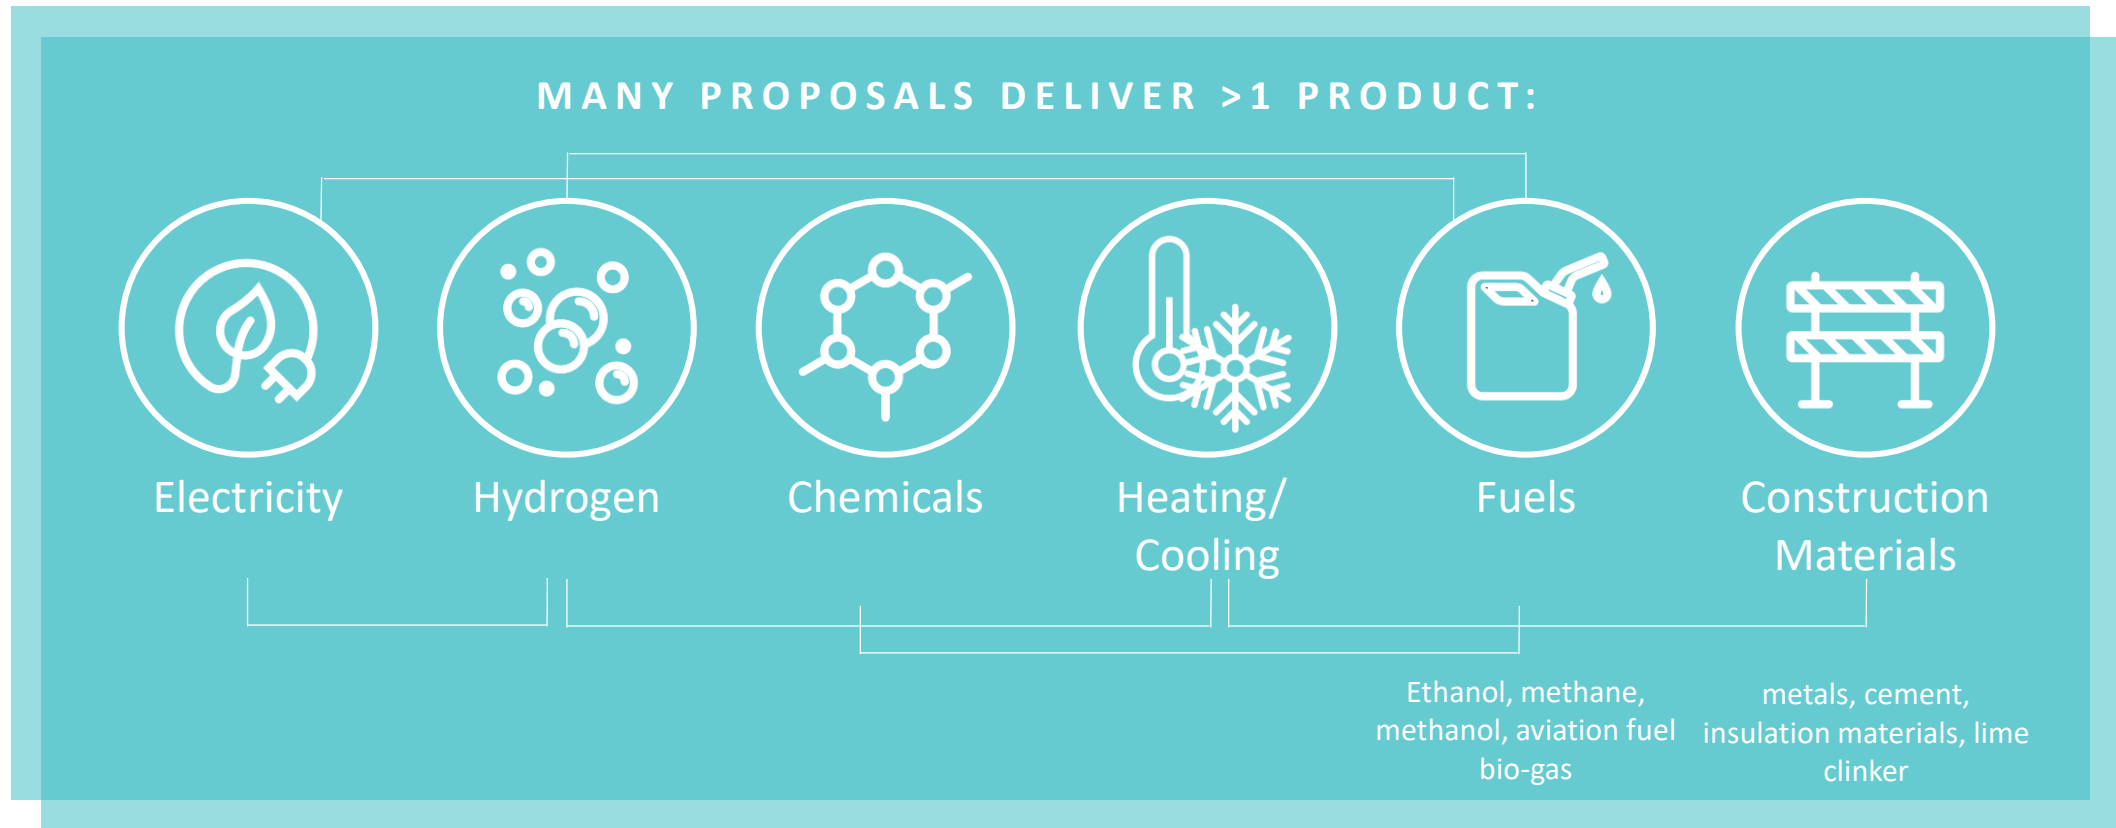

Legend: Percentage based on total number of proposals received. High-level screening of applied technological pathways.

RENEWABLE ENERGY & ENERGY STORAGE

Legend: High-level screening of applied technological pathways.

FINAL PRODUCTS

LOCATION DISTRIBUTION

PROJECT LOCATION OF THE PROPOSALS

PROJECT LOCATION OF THE **HYDROGEN** PROPOSALS

H₂ PROJECT PROPOSALS SUGGEST
LOCATIONS IN ALMOST ALL MEMBER
STATES, WITH THE MAJORITY SITED IN
GERMANY, NETHERLANDS, FRANCE & SPAIN.

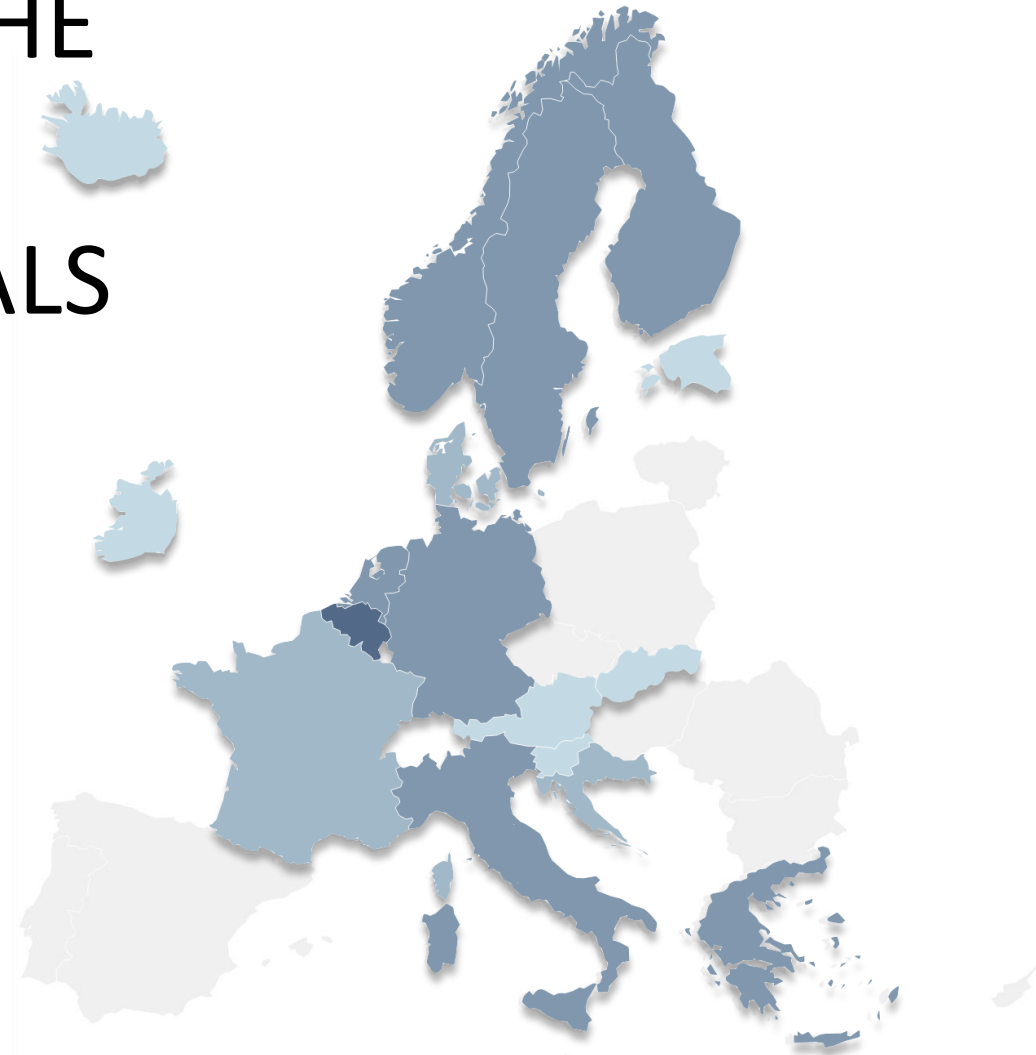

LOCATION DISTRIBUTION

PROJECT LOCATION OF THE CARBON CAPTURE TECHNOLOGY* PROPOSALS

*projects that capture CO₂ for use **and/or** storage

WHILE THE MAJORITY OF THE CCUS
PROJECTS ARE LOCATED AROUND THE
NORTH SEA, SOME OF THEM ARE ALSO SITED
WITHIN THE MEDITERRANEAN REGION.

PROJECT LOCATION OF THE BIO-BASED PROPOSALS

MANY PROJECTS ARE BIO-BASED AND ARE FAIRLY SPREAD ACROSS THE EU WITH A NUMBER OF THEM IN SPAIN AND THE NETHERLANDS.

Q&A

we are  **ICF**

 **Fraunhofer**
ISI

Support for the management of the Innovation Fund calls for proposals

- Initial results of large-scale call applicant survey

Ralitsa Donkova, ICF
Jonathan Lonsdale, ICF

Agenda

- 1. Findings from the survey on the application process for the First-Stage Large-Scale Call**
 - Information on respondents
 - Support through Helpdesk and webinars
 - Application process
- 2. Initial recommendations**

Survey on large-scale call application process

Objective

- To identify key challenges applicants faced with the call process and to provide recommendations for how forms, procedures, applied methodologies and guidance could be improved in the future.

Process

- Implemented via EU Survey
- Sent via email to all applicants, all Helpdesk users and the IFEG
- Opened 19 November → 2 December 2020
- 225 responses

Background of survey respondents

Survey achieved broad sectoral coverage

■ Large (250 or more employees)
 ■ Medium (50 to 249 employees)
 ■ Small (10 to 49 employees)
 ■ Micro (1 to 9 employees)

ICF proprietary and confidential. Do not copy, distribute, or disclose.

n = 225

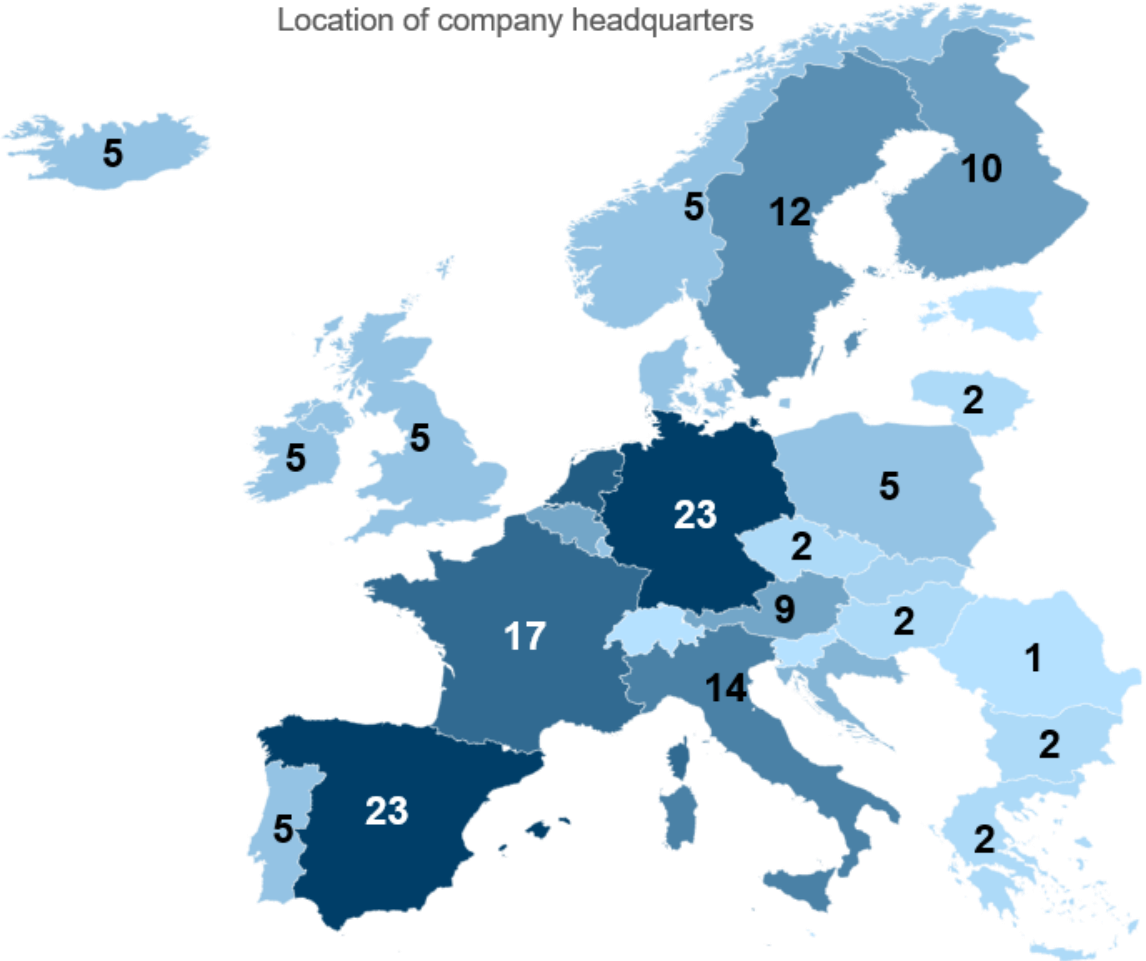

Good balance achieved across firm sizes

n = 225

Good geographical spread of respondents

Location of company headquarters

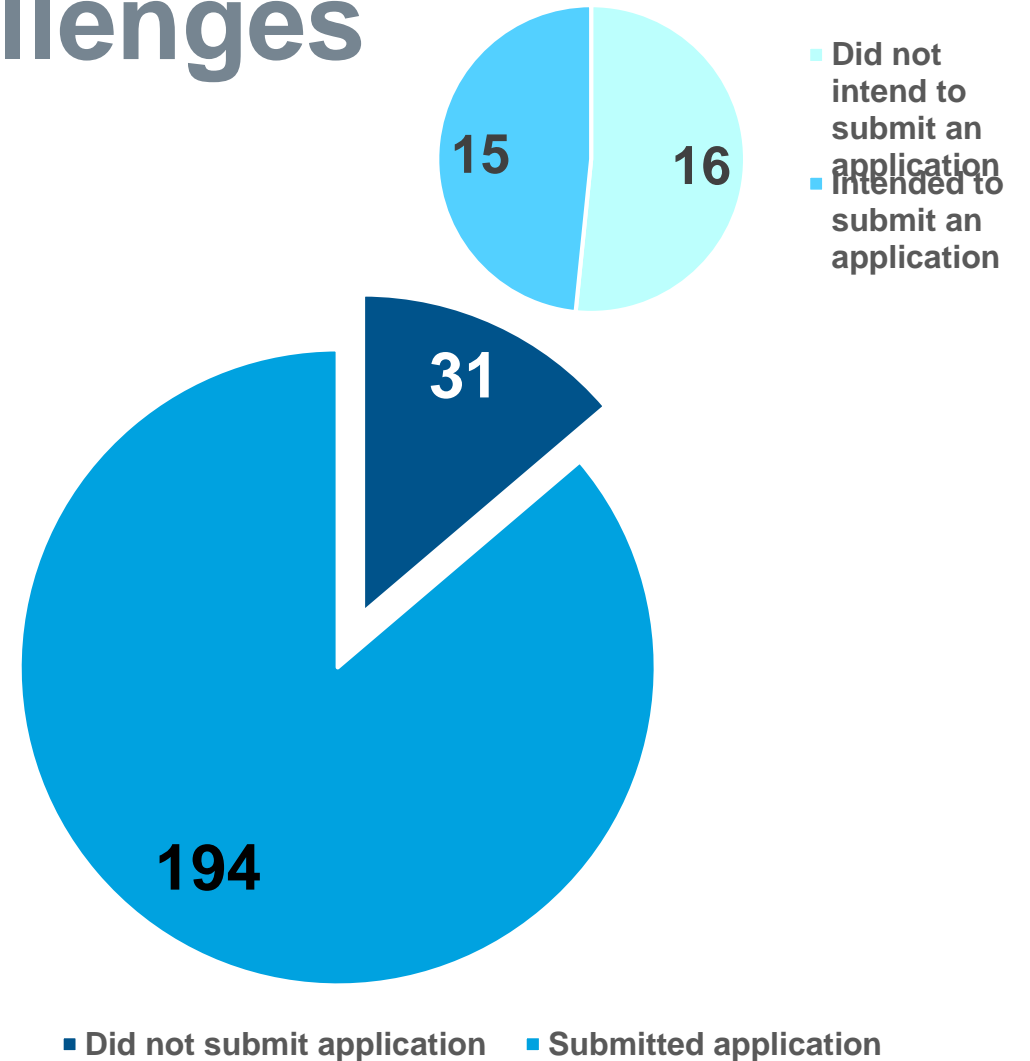

Not shown:
Colombia,
Costa Rica,
Liberia &
Uganda

n = 224

Applicants did not report facing regulatory barriers or Covid-19 challenges

- Of the 31 who did not submit an application, half (15) intended to apply but did not due to:
 - Timing of application (6)
 - Maturity of project (3)
 - Unable to meet documentation requirements (4)
- Only 4% of all respondents reported facing regulatory barriers
- 11% say the Covid-19 crisis affected their company's decision to apply

Support for applicants

Helpdesk and webinars

Helpdesk support

■ Answer did not help complete the application

■ Submitted a Helpdesk question

■ Did not submit a Helpdesk question

- More than half of respondents submitted a helpdesk question
- Vast majority of respondents report that the answer to their Helpdesk question helped them complete the application
- Applicants say that the time to receive responses was sometimes too long to be useful
- Some applicants say the answers were too generic

Ease of submitting a question

Response time

Usefulness of response

Webinar attendance

Publicity for webinar

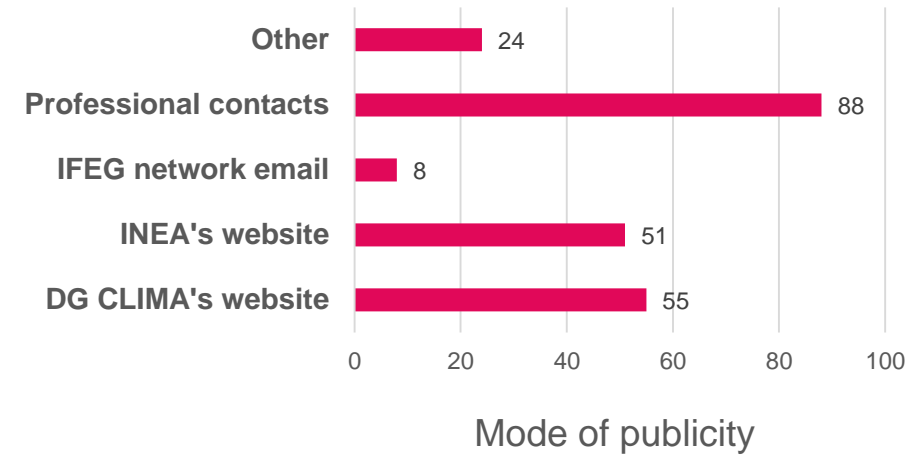

Ease of connecting

Usefulness of information

- Did not attend a webinar
- Attended a webinar

- High webinar attendance – 74% of respondents
- Respondents request more time for Q&A and more complex/ specific examples
- Webinars should be publicised earlier and through a more structured publicity campaign

n = 160

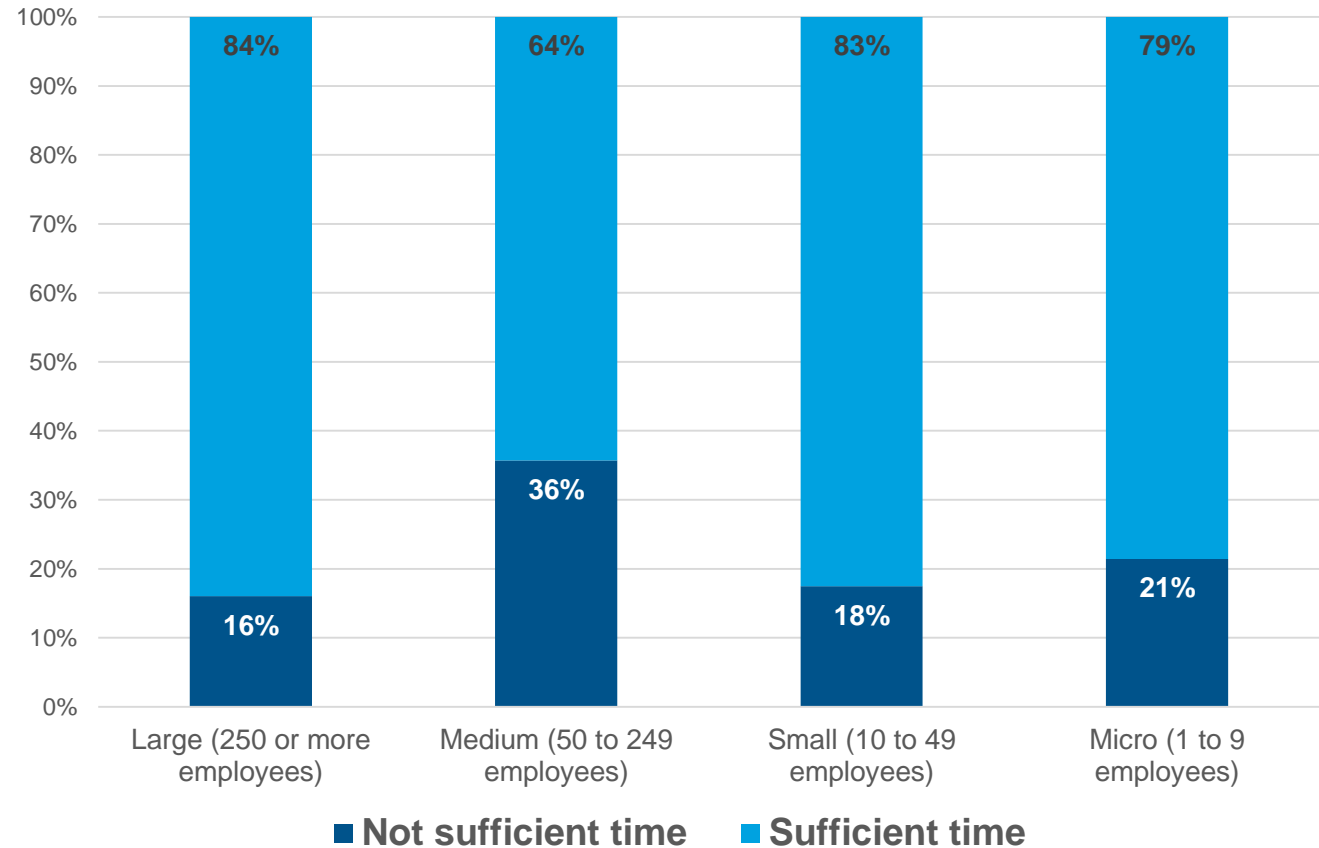

Application process

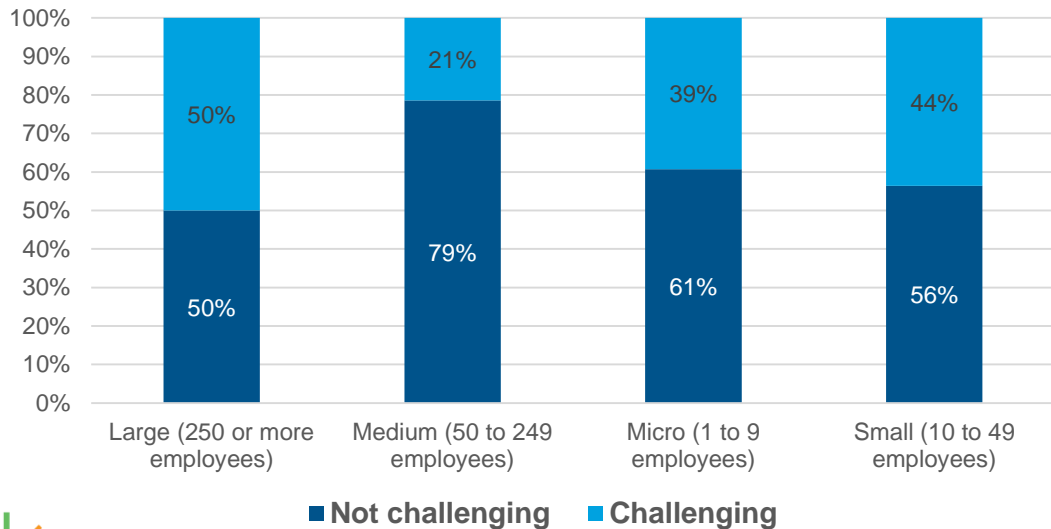

Logistics & availability of data

- **82% of respondents found the allotted time for completing the application to be sufficient**
 - Average time to prepare application was 9 weeks
 - Most common time was 12 weeks
- **86% found the Funding & Tenders portal easy to navigate**
- **75% report that it was easy to decide on the principal product**
- **86% had sufficient data to allow them to write their application**

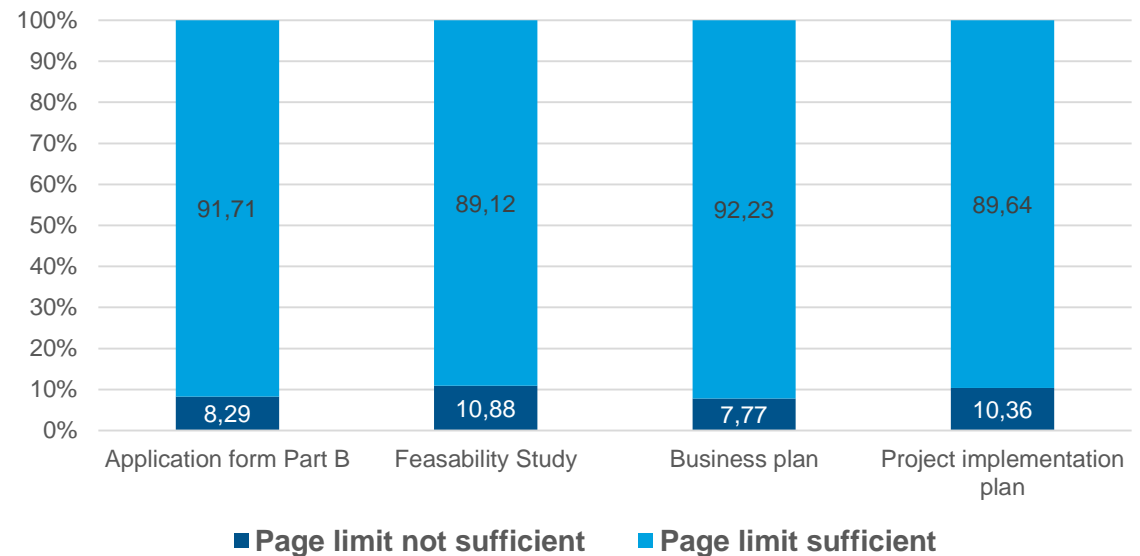

Ability to meet mandatory document requirements and stick to page limits

- Around half of respondents (55%) report the mandatory documents were not challenging to produce
 - However, a greater share of medium-sized companies did not find it challenging

- Almost all respondents found the page limits for different elements of the application to be sufficient

Clarity of application documents

- Vast majority of respondents found the clarity of the documents to be *good* or better
- Fewer than 10% of respondents found the documents to be *poor*
- GHG methodologies are least clear

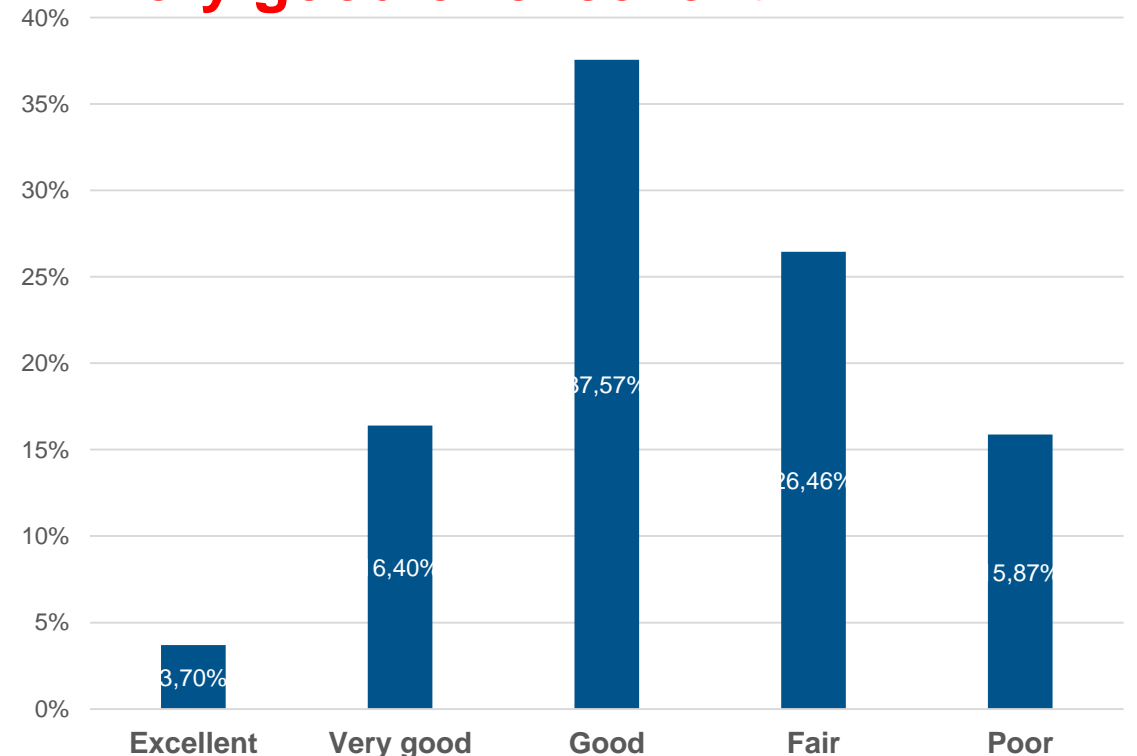

Evaluation criteria & GHG tools

- GHG emissions avoidance criterion was the most challenging element to complete, followed by Project Maturity & Degree of Innovation

- More than half of respondents (57%) rate the ease of working with the GHG calculation tools as good, very good or excellent

Use of consulting services to help applicants

- Use of consulting services is common to support and/or complete most of the application
- Usage greatly varies across company size:
 - Only 12% of large-sized companies were *not* supported by a consulting firm
 - Only 17% of micro-sized companies were supported by a consulting firm

■ Yes - we were partially supported in our application

■ Yes - a consulting firm completed most of the application on our behalf

■ No

Initial recommendations

Recommendations from first analysis of applicant feedback

- Avoid launching call during summer holidays
- Achieve faster response times on Helpdesk questions
- Clearly stated response time expectations for Helpdesk
- Provide more time for Q&A at webinars
- Develop more specific examples in both templates and webinars

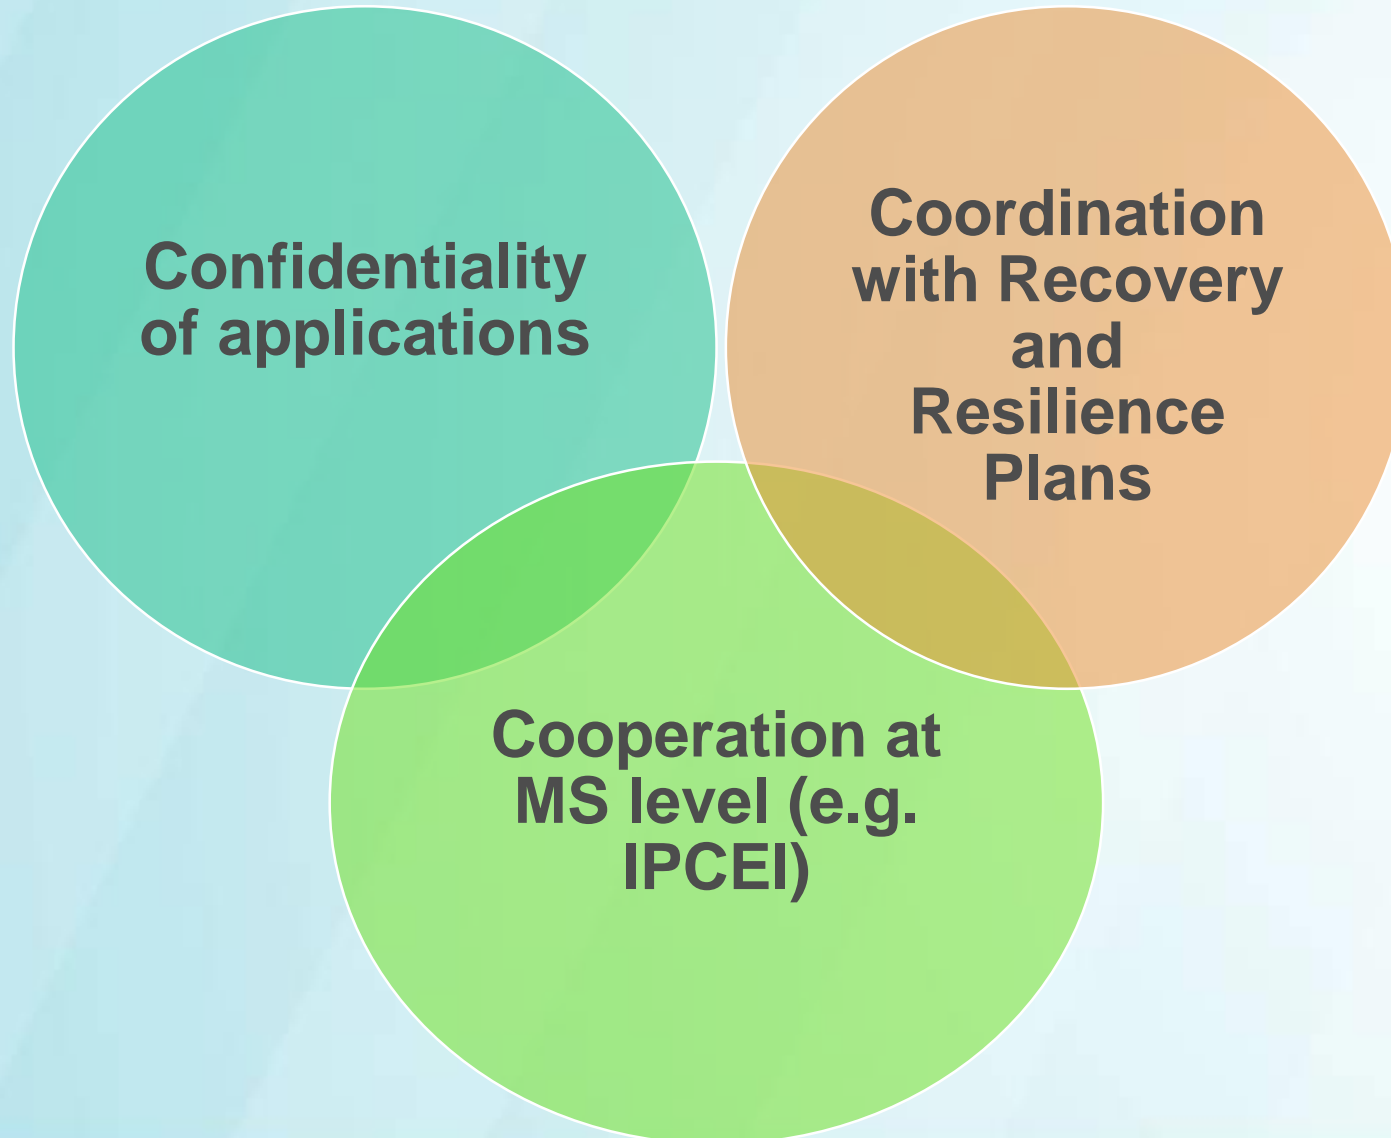

→ Further analysis of responses is currently being undertaken with the objective to integrate into a first 'Lessons Learned' report.

Q&A

Linking Member States and applicants

Linking Member States and applicants

Q&A

Sli.do

#IFEG

Would you consider a network of National Contact Points helpful?

Yes

No

Planning of calls in 2021

Call for large-scale projects

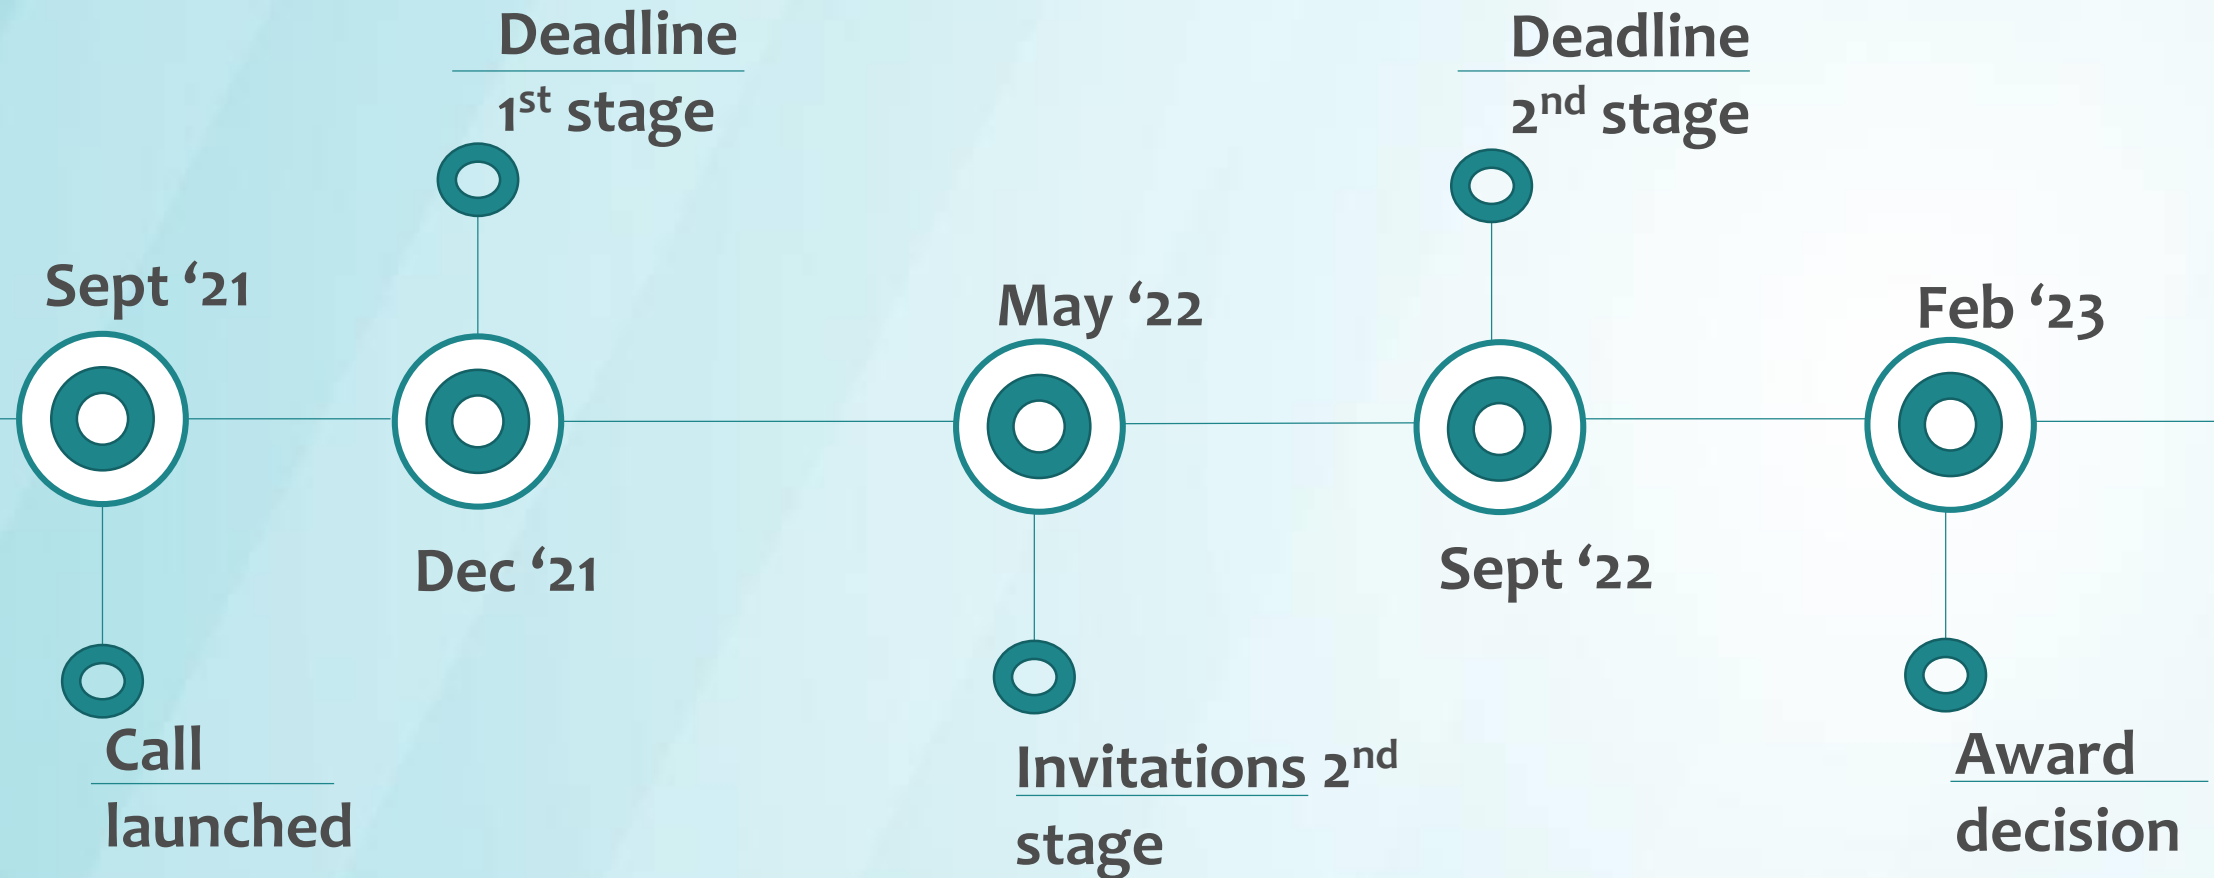

- Two-stage call from September 2021 to February 2023
- *Consider alternatively one-stage call from September 2021 to May 2022*

Call for small-scale projects

- One-stage call from December 2021 to September 2022

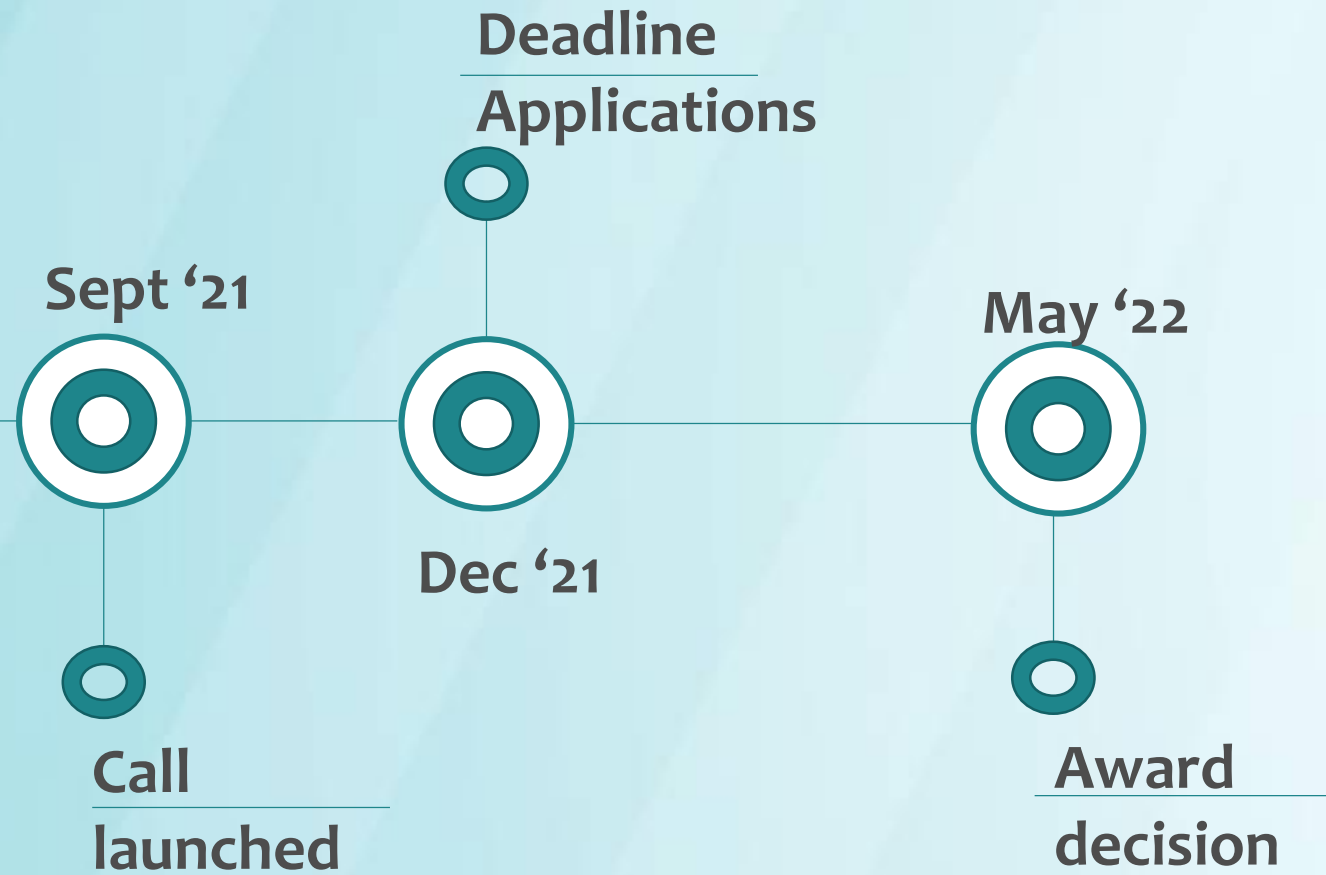

Two-stage call for large-scale projects

September 2021 to February 2023 (18 months)

One-stage call for large-scale projects

September 2021 to May 2022 (9 months)

- Faster implementation of existing project pipeline
- Higher requirements related to full application
- Change of delegated regulation needed

Call for small-scale projects

December 2021 to September 2022 (9 months)

Same timing as for first call for small-scale projects

How to enable more flexibility for calls for large-scale projects

Delegated regulation currently foresees two-stage application procedure

Delegated regulation could be amended

- To allow Commission to decide in consultation with expert group
- Whether one- or two-stage application procedure should be applied for next call
- As a function of project pipeline from previous call

Legislative procedure for amendment would take around 8 months

- Would need to be started in January for being applicable for next call in September 2021

Q&A

Sli.do #IFEG

Would you be in favour of an amendment of the delegated regulation to enable a choice between a one-stage or two-stage application procedure for the next large-scale call (e.g. depending on the available project pipeline from the first call)?

- Yes
- No

Join us as a project evaluator!

WE ARE LOOKING FOR

Technical Experts

Expertise on Life
Cycle Assessment

Financial Experts

Legal Experts

Check INEA website for the
application process!

- **Individual** evaluation
 - 5 working days or more
 - To be organized fully remotely from your office or home
 - Can be performed during weekends and evenings
- **Consensus group**
 - Full week of discussion with other fellow evaluators
 - Either in Brussels or virtually
- € 5000 compensation or more OR pro-bono
- **Confidentiality and conflict of interest rules apply**
