## 1. COUNTRY HIGHLIGHTS

Close to one in ten respondents in Croatia (9%) believe that climate change is the single most serious problem facing the world, a lower proportion than the EU average (18%). As in 2019, climate change ranks fourth in Croatia. However, close to eight in ten respondents (79% vs the EU average of 78%) consider climate change to be a very serious problem, an increase of seven percentage points since 2019.

More than half of respondents in Croatia think that national governments (52%, below the EU average of 63%) and the European Union (51%, below the EU average of 57%) are responsible for tackling climate change. These two actors have gained eight and three percentage points respectively since 2019. Just over a quarter of respondents (26%, largely below the EU average of 41%) say they are personally responsible for tackling climate change. However, six in ten respondents (60%, compared with the EU average of 64%) have taken action to fight climate change in the past six months, and this proportion rises to 97% (similar to the EU average of 96%) when asked to choose from a list of 15 possible actions to fight climate change.

Respondents in Croatia are less likely than the EU average to have taken any action to fight climate change, with the exception of being slightly more likely to have better insulated their home to reduce their energy consumption (22%, compared with the EU average of 18%).

Just over nine in ten respondents in Croatia (91%, compared with the EU average of 87%) agree that tackling climate change and environmental issues should be a priority to improve public health. Moreover, nearly nine in ten respondents (86%, above the EU average of 74%) agree that the cost of damage due to climate change is much higher than the investment needed for a green transition.

More than nine in ten respondents in Croatia think it is important that both their national government (93% vs the EU average of 88%) and the European Union (91% vs the EU average of 87%) set ambitious targets to increase the amount of renewable energy used by 2030.

More than nine in ten respondents in Croatia (95%, above the EU average of 90%) agree that greenhouse gas emissions should be reduced to a minimum while offsetting the remaining emissions in order to make the EU economy climate-neutral by 2050. Finally, just over seven in ten respondents (71%, compared with the EU average of 75%) think that the money from the economic recovery plan should mainly be invested in the new green economy.

## 2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

**QB1a** Which of the following do you consider to be the single most serious problem facing the world as a whole? (%)

**QB1T** Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS) (%)

## 2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 2/2

**QB2** And how serious a problem do you think climate change is at this moment? Please use a scale from 1 to 10, with '1' meaning it is "not at all a serious problem" and '10' meaning it is "an extremely serious problem". (%)

EU27 Outer pie HR Inner pie

- Total 'Not a serious problem' (1-4)
- Total 'A fairly serious problem' (5-6)
- Total 'A very serious problem' (7-10)
- Don't know

EU27		HR	
2021	2021-2019	2021	2021-2019
7	+ 1	5	- 2
15	+ 1	16	- 4
78	- 1	79	+ 7
0	- 1	0	- 1

**QB7** Do you think that the (NATIONALITY) government is doing enough, not enough or too much to tackle climate change? (%)

- Enough
- Not enough
- Too much
- Don't know

5. LOOKING TO THE FUTURE

**QB8** How important do you think it is that the following authorities set ambitious targets to increase the amount of renewable energy used, such as wind or solar power, by 2030?  
(%)

**QB9** How important do you think it is that the following authorities provide support for improving energy efficiency by 2030 (e.g. by encouraging people to insulate their home, install solar panels, or buy electric cars)?  
(%)

**QB10** To what extent do you agree or disagree with the following statement: We should reduce greenhouse gas emissions to a minimum while offsetting the remaining emissions, for instance by increasing forested areas, to make the EU economy climate-neutral by 2050.  
(%)

**QB11** Do you think that the money from the economic recovery plan should mainly be invested in the traditional fossil-fuelled economy or in the new green economy?  
(%)
