## Assess Quantitative Criteria beyond NACE4

- Assessing at NACE4 can be hiding specific products or groups of products which would meet the quantitative criteria laid down in the Directive.
- The indicators for these criteria should be calculated using more specific disaggregation levels such as PRODCOM 6-digit or 8-digit level

# Assess Quantitative Criteria beyond NACE4

- This approach is currently being considered for the following sectors:

15.42	Manufacture of refined oils and fats	Refined soya bean and its fractions
15.89	Manufacture of other food products n.e.c.	Dry yeast
17.30	Finishing of textiles	Dying of cotton yarns Dyeing of thread of synthetic filaments (excluding sewing thread)
20.20	Manufacture of veneer sheets; manufacture of plywood, laminboard, particle board, fibre	Fibre-board Plywood
24.11	Industrial gases	Hydrogen
26.14	Glass fibres	Reinforcement fibres
26.82	Manufacture of other non-metallic mineral products n.e.c.	Expanded Clay Artificial Graphite

# Qualitative Criteria as for the criteria foreseen in the Directive

- This approach is currently being considered for the following sectors:

17.30	Finishing of textiles
20.20	Manufacture of veneer sheets; manufacture of plywood, laminboard, particle board, fibre board and other panels and boards
24.11	Manufacture of industrial gases
26.30	Manufacture of ceramic tiles and flags
26.40	Manufacture of bricks, tiles and construction products, in baked clay
27.51	Casting of iron
27.52	Casting of steel

- If still not meeting the QT criteria when data further validated:

24.15	Manufacture of fertilizers and nitrogen compounds
27.52	Manufacture of plastics in primary forms
