

# Accreditation body's view on the AVR and AV guidance materials and preparation for the third trading period

Radim Frolik

**CZECH ACCREDITATION INSTITUTE**

## Accreditation body's view on the AVR and AV guidance materials and templates

The Accreditation and Verification Regulation - Explanatory Guidance

Key guidance note

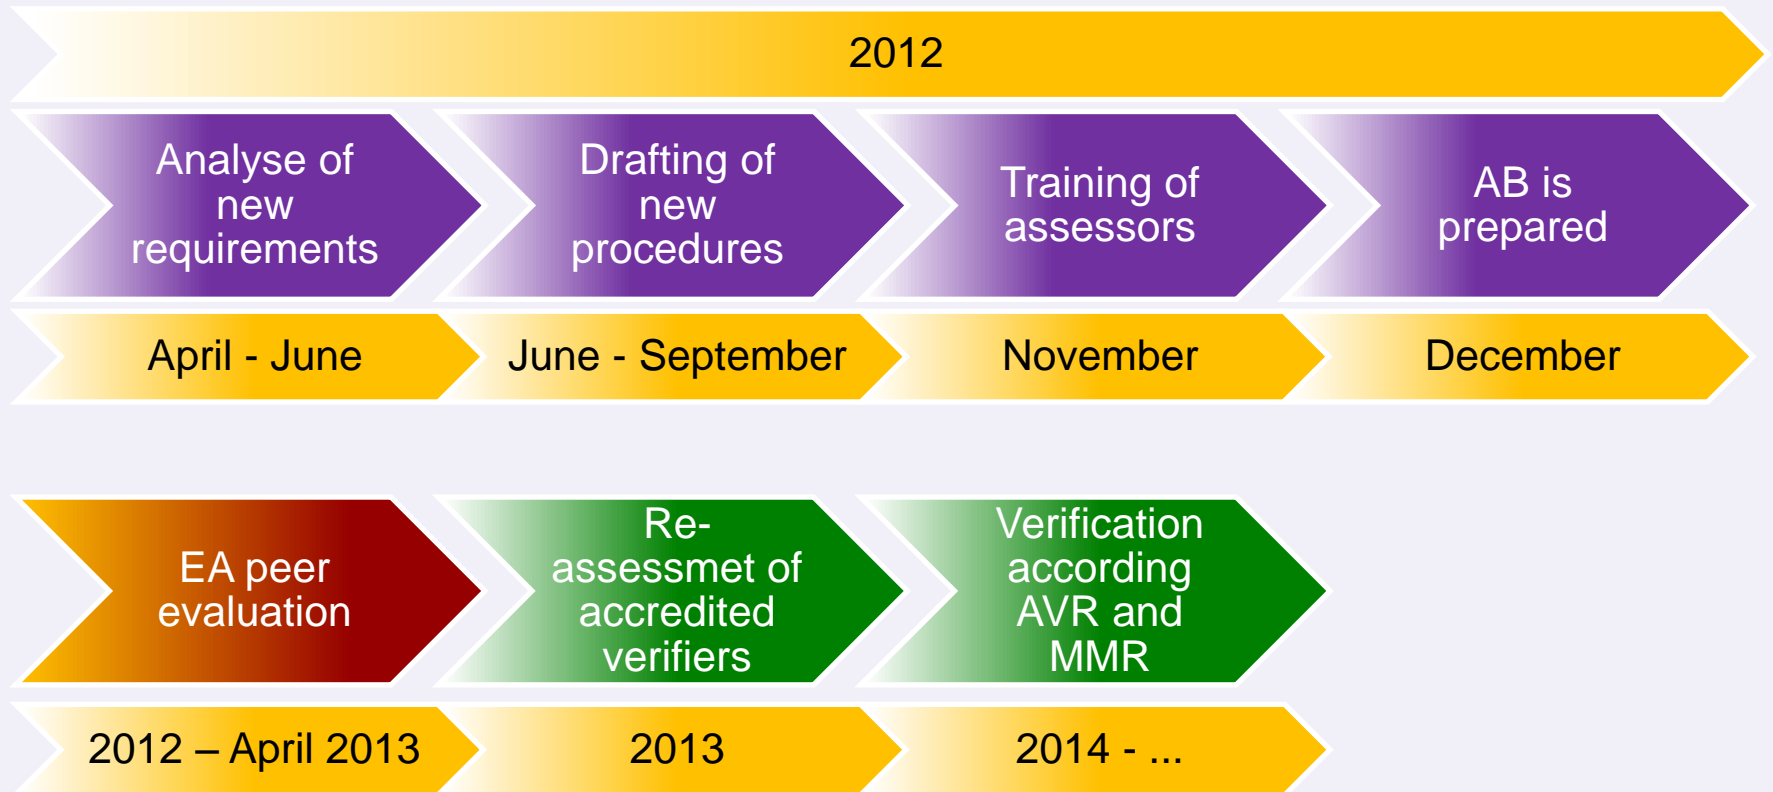

- Relation between the AVR and EN ISO/IEC 17011
- Relation between the AVR and EN ISO 14065
- Competence
- Information exchange templates

*Be aware of other documents not mentioned in guidance (e.g. ISO 14066, IAF MD6)*

Valuable introduction for „new comers“

**☞ To assure that the guidance will reach right persons in all member states.**

## AVR implementation schedule

## Expectations

- Appreciation that AVR utilised rules from EA-6/03
- No problems with competence assessment
- No significant changes in assessment approach
- ISO 14065 revision
- Difficulties with information exchange

*The anticipated time and place of the verification are hardly feasible to get by 15 November.*

**For „new comers“ it is a tight schedule to achieve!**

## Proposals for future

- Stabilise the system!
- Reconsider feasibility and added value of requirements on information exchange
- I don't see necessity of additional guidance documents
- Organise training sessions to achieve harmonised implementation.  
Preferably in Member States
