Excel template approach

Excel template approach

- Several means of communication (phone, email, fax, ...)
- MRV information through files (Excel, CSV, ...)
- Storage of information distributed among parties
- Publication of information requires compilation of files
- Harmonisation through the mandatory use of templates
- Version control of templates is required

Integrated web-based tool approach

Integrated web-based tool approach

- Communications centralised in one system
- MRV information reported in predefined web-forms
- Storage of information centralised in one system
- Facilitated publication of information
- Harmonisation through the use of the web-based tool
- Version control only for one system

Internal audit events

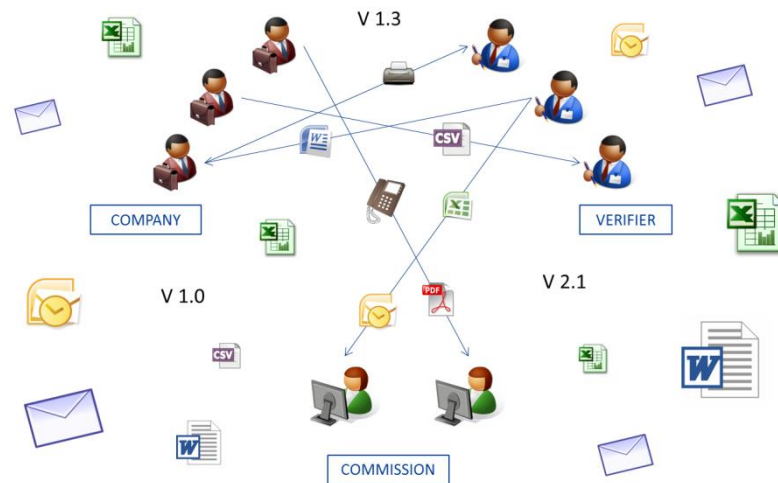

Follow-up among parties

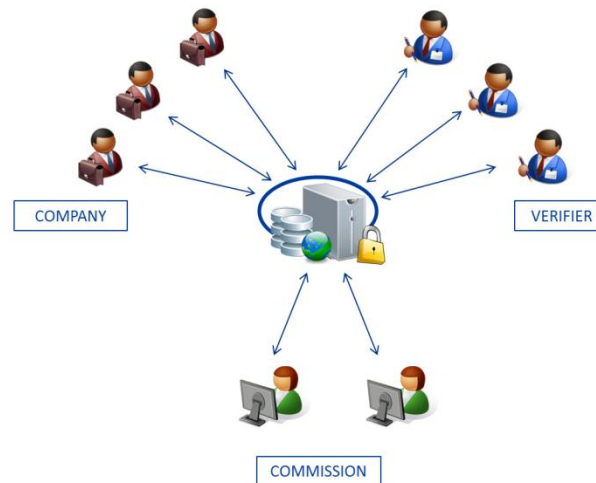

System support

Excel template approach

Integrated web-based approach

- *Which would be the preferable approach?*
- *What would be the main concerns?*

With regards to:

- *Security of information*
- *Access rights*
- *Control over workflow / processes*
- *Harmonisation / level playing field*
- *Simplicity and user-friendliness*
- *Cost and time effectiveness*
- *Template versioning control*
- *Updates and enhancements*

Thank you!
