DECLARE usage:

- since May 2016 → MRV administrator
- since February 2017 → NEC administrator

Statistics

	Monitoring Plans	Annual Emission Reports	Improvement Reports
Uploads	79	122	31

FINDINGS

Monitoring Plans

Annual Emission Reports

Errors

Installation category has to be "A", "B" or "C" (sheet C Installation Description)

- Monitoring Methodology cannot be derived from the provided value (sheet J accounting)
- Value doesn't match as a reference value in database (sheet B Installation Description)

Warnings

Required tier is not met (sheet E Source Streams)

- CRF category cannot be derived from the provided value (sheet B Installation Description)

Why to use **DECLARE?**

- Backup** → all MP, AER, IR
- Integrity** inspection of MP, AER, IR before approval
- Tier requirements** on specific Source stream
- Integrity inspection of **NAT table** before submission
- Complete **Organisation details** and related history changes
- Aggregated data of all **submitted AER's** (emissions overview)
- Compliance cycle info** for each installation for a given reporting period
- Overview** of specific Reporting period classification

What else to expect?

- Cross checking** between AER and MP
- Efficient overview** data export, directly related with information for Art. 21 Report of the EU ETS Directive
- Enhanced consistency** inspection of MPs and AERs, e.g. including implementation of the specified measurement systems in relevant source streams
- Automatic reminder** for potential IR submissions from installations under the scope of Article 69 of MRR

Thank you for your attention
