

Carbon Farming Initiative Guidance on carbon farming

Clunie Keenleyside and Geoff Radley IEEP

The brief

- Technical guidance on setting up Carbon Farming Schemes (CFS), at a level of detail and granularity that could be a basis for an EU-wide or Member State policy
 - how to encourage and enable CFS
 - how to quantify possible financial incentives for additional climate performance
 - take account of/build on different regional conditions
 - scheme design, operational requirements, communication, eligibility
 - potential for cooperation
- Focus on result-based mechanisms

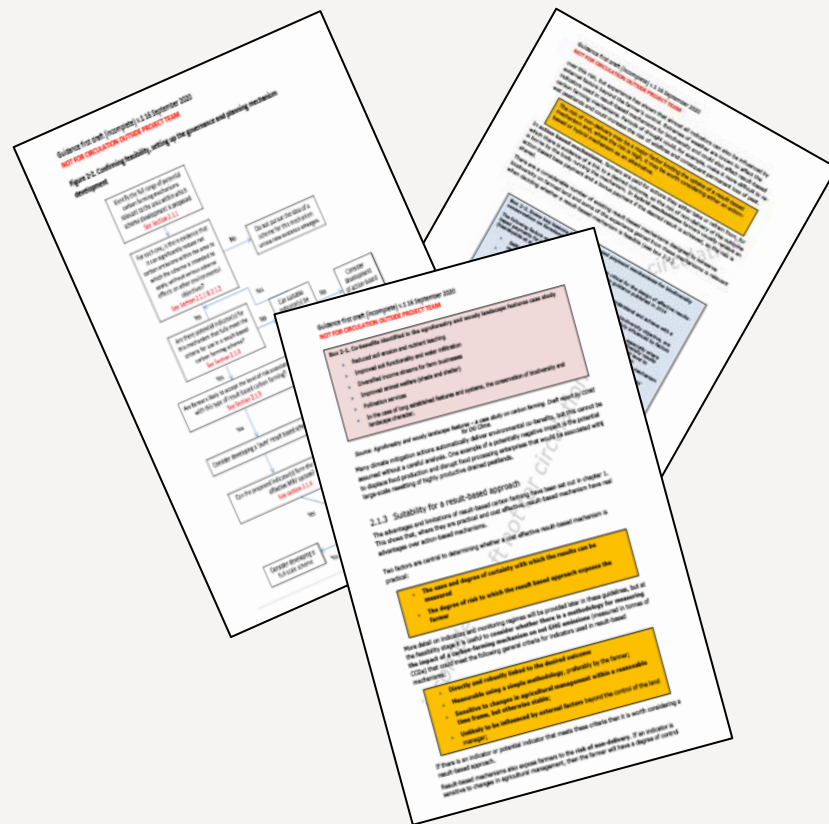

Audience and format

Audience

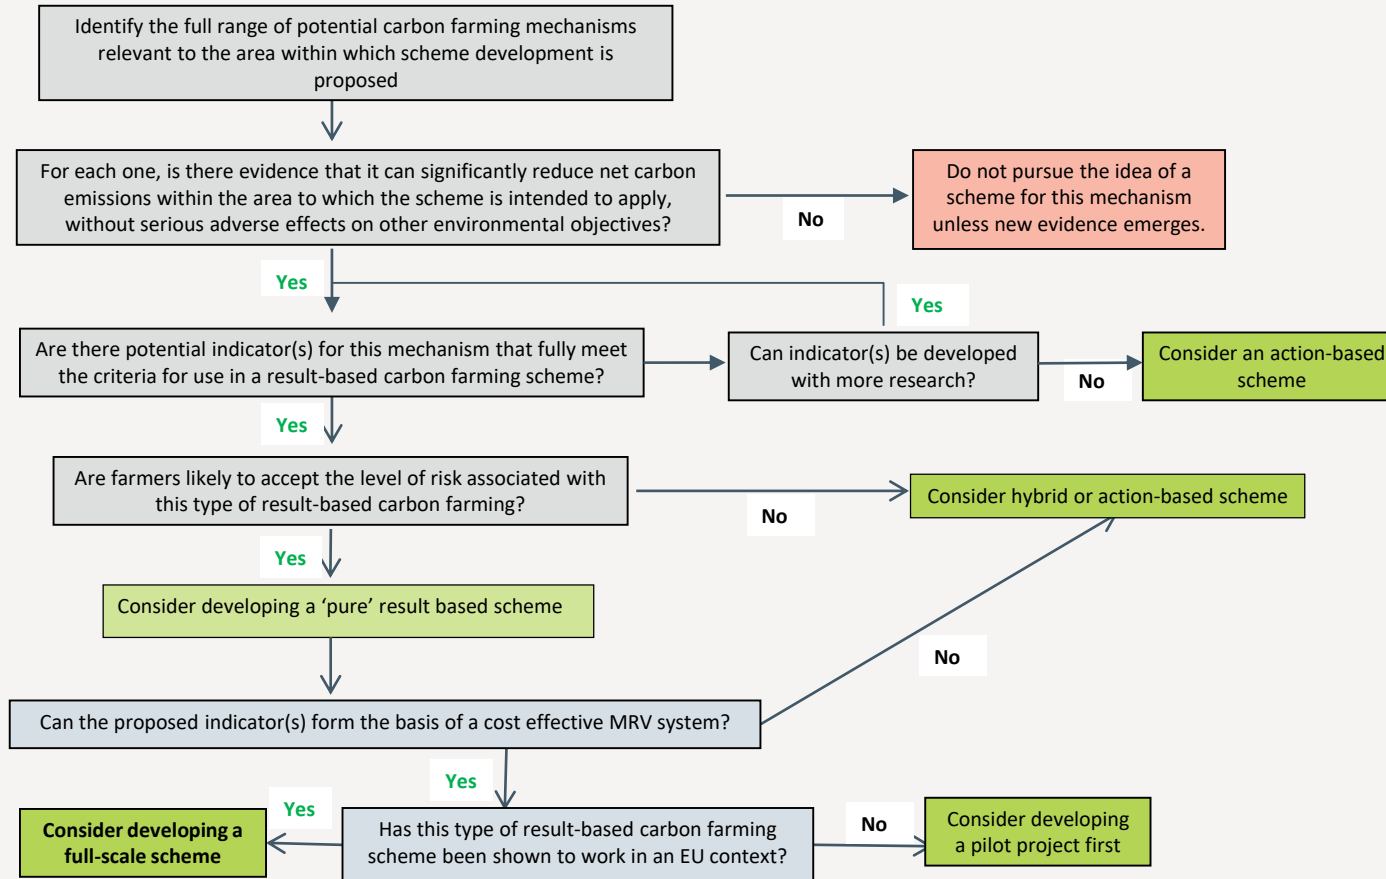

- Institutions setting up regionally appropriate Carbon Farming Schemes

Format

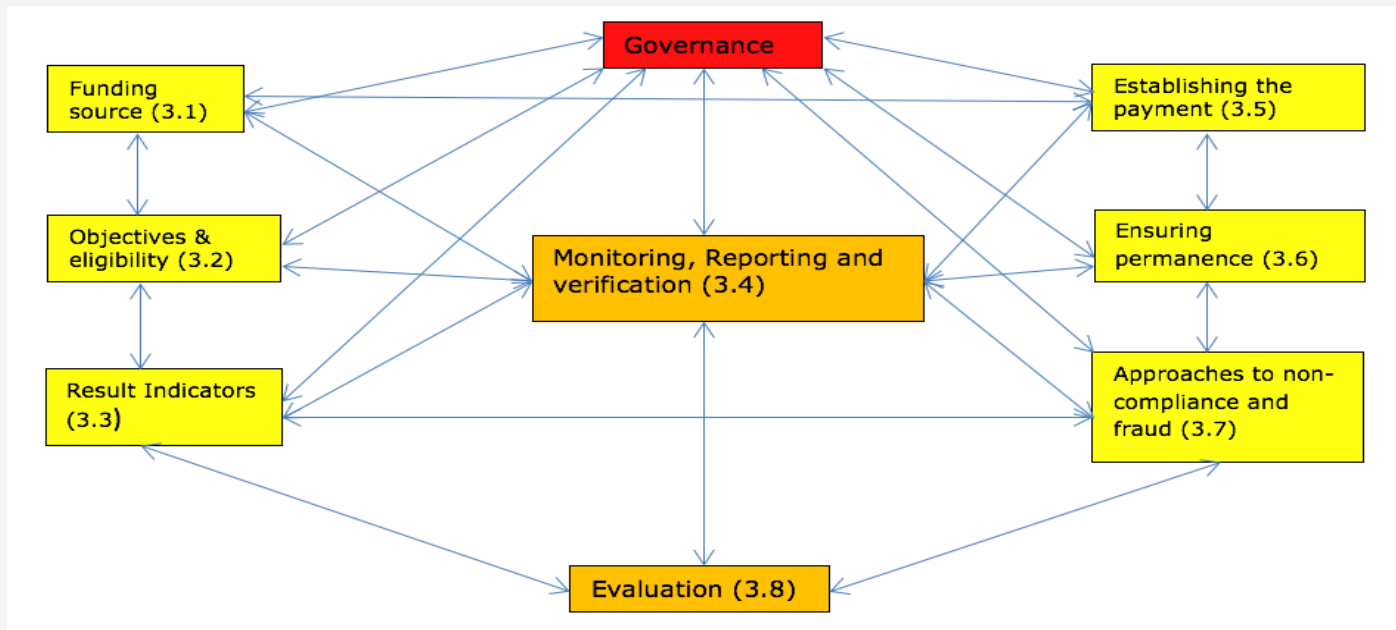

- Accessible, relevant, timely, concise and clear
- Illustrated by case study examples
- Decision trees, key steps, sources of further information

Feasibility of Carbon Farming Scheme

Key design elements of a result-based Carbon Farming Scheme

Thank you!

See: Technical guidance for setting up and implementing result-based carbon farming mechanisms in the EU (forthcoming)
