

# AUCTIONS BY THE TRANSITIONAL COMMON AUCTION PLATFORM

The world's largest auctioning of emissions allowances

March 2014

Auction platform: European Energy Exchange (EEX)

Auction dates/reporting period:

3, 4, 5, 6, 10, 11, 13, 17, 18, 20, 24, 25, 27, 31<sup>1</sup>

\_\_\_\_\_

In 2013, more than 40% of allowances allocated under the EU ETS have been auctioned instead of being allocated free of charge. Auctioning emission allowances at that scale is unprecedented and delivers valuable experience for auction design in other carbon markets and for other environmental assets.

Auctioning is the most transparent method of allocating allowances and puts into practice the principle that the polluter should pay. With some limited exceptions, from 2013 electricity generators must buy all their allowances: experience shows that they have been able to pass on the notional cost of allowances to customers even when they received them for free.

Most of the allowances to be auctioned are allocated to States on the basis of their historical share of emissions from EU ETS installations. Ten per cent are allocated to the least wealthy EU member states and the remaining 2% is given as a 'Kyoto bonus' to nine EU member states which had most reduced their greenhouse gas emissions.

At least half of auctioning revenues, and all of the revenues from auctioning allowances to the aviation sector, should be used to combat climate change in Europe or other countries.

EEX (Leipzig) conducts the auctions for 26 Member States covering about two thirds of the total auctioned volume. For the remaining volume, Germany and the United Kingdom have appointed EEX and ICE Futures Europe (ICE, London) respectively.

For further information: <a href="http://ec.europa.eu/clima/policies/ets/cap/auctioning/index">http://ec.europa.eu/clima/policies/ets/cap/auctioning/index</a> en.htm

On 5 March, EEX conducted one auction for Poland.

#### March 2014

Editor's note: This report has been prepared by the Commission on behalf of the following Member States: Austria, Belgium, Bulgaria, Croat Republic, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain and Sweden. These Member States have approved this report under the rules in the Joint Procurement Agreement to procure common auction platforms (except for Poland, whose comments were requested separately). The report complies with the requirement laid down in the fourth subparagraph of Article 10(4) of Directive 2003/87/EC.<sup>2</sup>

**Methodology:** The report is based on the reports submitted by EEX, on the discussions in regular meetings between the Commission, its advisors and EEX and on any further relevant information available to the Commission. The authors of the report did not actively verify EEX's compliance with the specific rules and provisions applicable under European or national law.

For reasons of confidentiality and proper enforcement of the applicable rules, the report refers only to public reporting on the auctions and not to any non-public reports.

**Disclaimer:** The authors have made every effort to ensure that the information provided is complete, correct and precise for the reporting period. Nevertheless, the report is based on limited information available to the authors in a market context where much information has to remain confidential. The authors did not actively verify the information. Therefore, the authors and the Member States on whose behalf this report was drafted deny any responsibility or liability whatsoever for its contents, regardless of the nature of such contents. Any reliance by any person or entity on the information provided in this report is solely at that person's or entity's own risk.

**Glossary:** terms and expressions written in *italics* are included in the glossary.

2

Directive 2003/87/EC of the European Parliament and of the Council of 13 October 2003 establishing a scheme for greenhouse gas emission allowance trading within the Community and amending Council Directive 96/61/EC, OJ L 275, 25.10.2003, p. 32, as subsequently amended.

#### March 2014

## **Executive summary**

This report covers the auctioning of emissions allowances in the period March 2014. In that period, EEX, in its capacity as the common auction platform, auctioned a total of 37 603 500 EU general emission allowances ('EUAs') in 13 auctions for the third trading period on behalf of those EU Member States that participate in the transitional common auction platform (participating Member States). EEX also conducted one auction of 4 445 000 EUAs for Poland.

In accordance with the Commission Regulation (EU) No 176/2014 determining the volumes of greenhouse gas emission allowances to be auctioned in 2013-20, specifically the back-loading of allowances from the years 2014, 2015 and 2016 to the years 2019 and 2020<sup>3</sup>, the volumes to be auctioned have been reduced. Accordingly, the volumes auctioned by the common auction platform have been revised as of 17 March 2014. The revised auction calendar is published on EEX website.

The total amount raised from the 14 auctions held during the reporting period was EUR 269 929 405. Taking into account the volumes per auction, the weighted average clearing price during the reporting period was EUR 6.42 per EUA.

During the reporting period 64 bidders were eligible to bid in the auctions, of which 43 qualified as operators in the EU ETS.

All auctions were held securely and smoothly and no irregularities or deviations from the requirements were observed.

Generally, the auction clearing price was in line with the price signal in the secondary market.

During the reporting period, EEX did not hold any auction for *EU aviation allowances* ('*EUAAs*'). In response to the positive developments at previous ICAO Assembly, the Commission proposed an amendment to the EU ETS Directive of 16 October 2013 regarding aviation emissions<sup>4</sup>. This amendment has been adopted by Regulation (EU) No 421/2014, published on 30 April 2014<sup>5</sup>. One of the derogations would allow aircraft operators to surrender allowances with respect to 2013 emissions by 30 April 2015 instead of 30 April 2014. In view of this, the Commission and the Member States had asked EEX to put on hold aviation allowances auctions until there is greater clarity on the final version of the amendment, and hence the appropriate volumes to be auctioned. With the recent adoption of the Regulation, the preparation to resume auctioning of aviation allowances is ongoing. Further information will be published.

#### March 2014

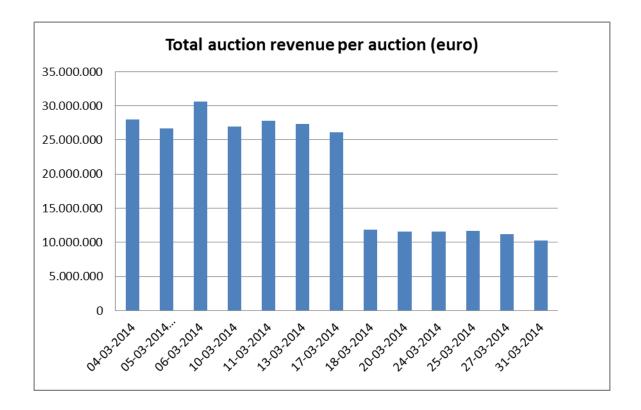

#### Section 1. Results of the auctions

During the month of March 2014, EEX, in its capacity as the transitional common auction platform, auctioned, in 13 auctions, a total of 37 603 500 *EUAs* valid for the *third trading period* on behalf of all 24 EU Member States that have contracted EEX and appointed it as the transitional common auction platform. EEX also conducted one auction of 4 445 000 EUAs for Poland as the latter contracted EEX for auctioning its share of allowances pending the appointment of its 'own' auction platform.

The total amount raised from the 14 auctions held during the reporting period was EUR 269 929 405 (see Graph 1 and Table 1). Taking into account the volumes per auction, the weighted average clearing price during the reporting period was EUR 6.42 per EUA. This is an increase of EUR 0.03 per EUA compared with the previous reporting period.

For all graphs in this report where it is relevant, information pertaining to the auction conducted for Poland is indicated in the horizontal date axis of the graph with (PL).

**Graph 1** Total auction revenue per auction (euro).

## March 2014

**Graph 2** Auction revenues per auction as from April 2013.

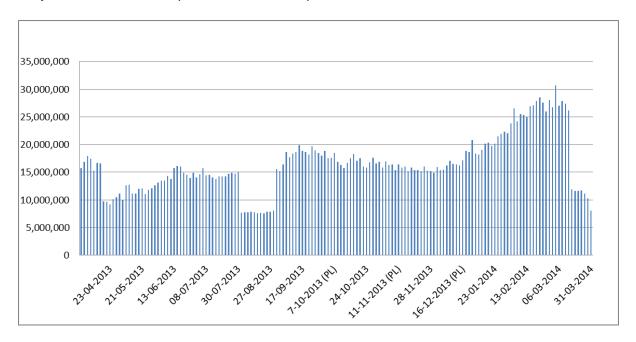

Table 1 Auction revenues per Member State (euro).

<sup>\*</sup> average

#### **Auctioning Member States**

At the start of the reporting period, the auctioneers of 24 participating Member States had been admitted and recognised by EEX/ECC and were participating in the auctions.

In accordance with the second subparagraph of Article 30(7) of the *Auctioning Regulation,* pending the procurement, appointment and listing of its opt-out auction platform, Poland contracted EEX to auction its share of allowances to be auctioned. These auctions started on 16 September 2013.

<sup>\*\*</sup>volume-weighted average (when the volume of allowances sold varied between auctions within a month, see auction volumes in Annex I)

#### March 2014

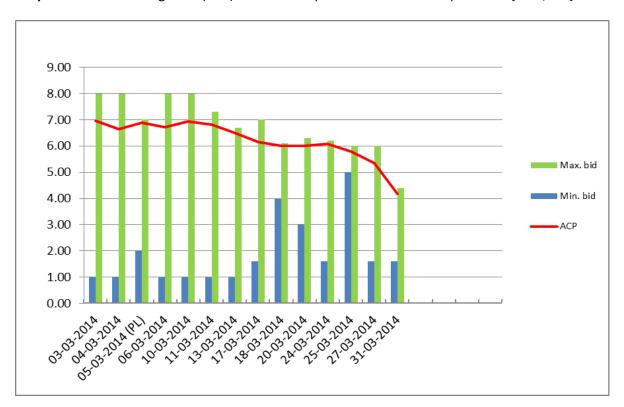

On 1 July 2013, Croatia joined the European Union, and it has become a party to the Joint Procurement Agreements so as to auction its share of allowances on EEX. The auctioneer appointed by Croatia has, however, still to submit the necessary documentation. Hence, the starting date remains to be determined.

The Member States of the European Free Trade Association (EFTA) that are Party to the European Economic Area (EEA)<sup>6</sup> have also stated their intention to make use of the transitional common auction platform by aggregating their volumes to those auctioned on behalf of the participating Member States. The preparations for this are on-going.

### Auction clearing price

During the period under consideration, the auction clearing price for the EUAs moved between EUR 4.17 and EUR 6.97 per allowance (see Graph 3). The lowest auction clearing price in this reporting period is EUR 1.31 below the lowest auction clearing price during the previous reporting period. The highest auction clearing price in this reporting period is EUR 0.13 per allowance below the highest auction clearing price of the previous reporting period.

\_

<sup>&</sup>lt;sup>6</sup> Iceland, Liechtenstein and Norway.

#### March 2014

For all but one auction, the clearing prices were within a range of EUR 0.07 or less from the mean of the *best-ask* and *best-bid* prices on the EEX *secondary market* for spot emission allowances and in average EUR 0.01 below that mean. In general, the auction clearing prices were also in line with the prices of carbon products on other trading venues, and with the clearing prices of other auctions of emission allowances conducted during the period.

The auction clearing price showed a decreasing trend at the end of the reporting period.

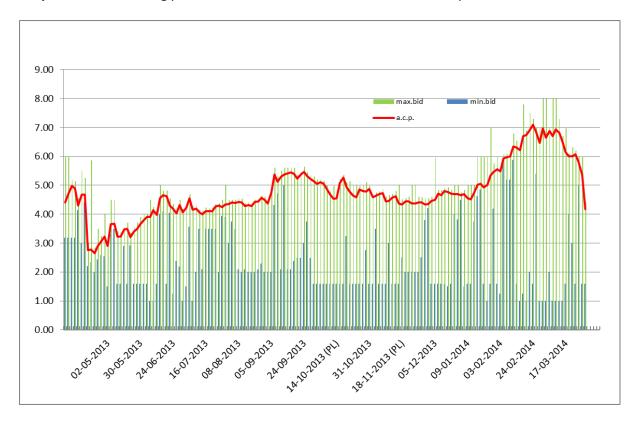

#### Maximum and minimum prices bid

The highest prices bid in the auctions were on average EUR 0.57 per EUA above the clearing price (see Graph 3).

The lowest prices bid in the auctions were on average EUR 4.33 per EUA below the clearing price. This difference was smaller for five auctions during the reporting period.

The average difference between the maximum price bid and the minimum price bid in the auctions was EUR 1.15 higher than the difference for the auctions conducted in the preceding month.

**Graph 4** Auction clearing price, maximum bid and minimum bid as from April 2013.

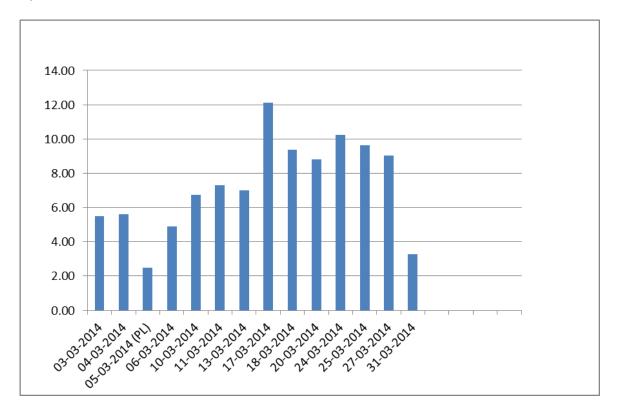

#### March 2014

### Cover ratio

The *cover ratio* — the bid volume as a proportion of the available volume in the auction — (see Graph 5) moved between 2.50 and 12.10 during the reporting period. The average was about 76% higher than the average *cover ratio* during the previous reporting period<sup>7</sup>. The lowest *cover ratio* during the reporting period was 2.50 at the auction of 5 March 2014 with the highest *cover ratio* being 12.10 at the auction of 17 March 2014. Changes to the cover ratio within the period and in comparison to previous periods derive *inter alia* from the significant change in volume occurred from 17 March 2014.

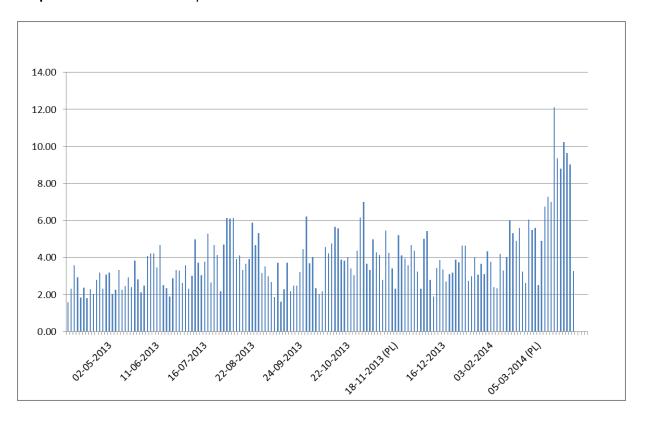

**Graph 5** Cover ratio: bid volume versus available volume.

<sup>&</sup>lt;sup>7</sup> Compared to the previous period, the auction volumes were reduced as of 17 March 2014 in implementation of back-loading.

#### March 2014

**Graph 6** Cover ratio as from April 2013: bid volume versus available volume.

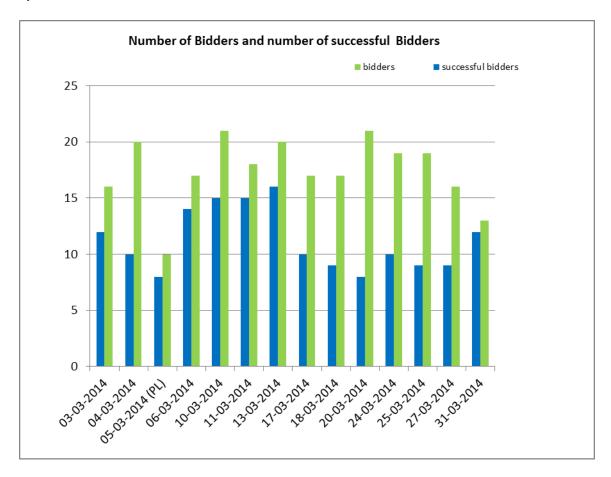

## **Number of Bidders**

The number of active bidders per auction ranged from 10 to 21 (see Graph 7). The average number of active bidders was 17, which is two less than the average number of active bidders during the previous reporting period. Overall, the number of active bidders per auction did not show a clear upward or downward trend during the reporting period.

The number of successful bidders per auction ranged from 8 to 15 during the reporting period. The average number of successful bidders was 11, which is three less than the average number of successful bidders during the previous reporting period. Overall, the number of successful bidders per auction did not show a clear upward or downward trend during the reporting period.

## March 2014

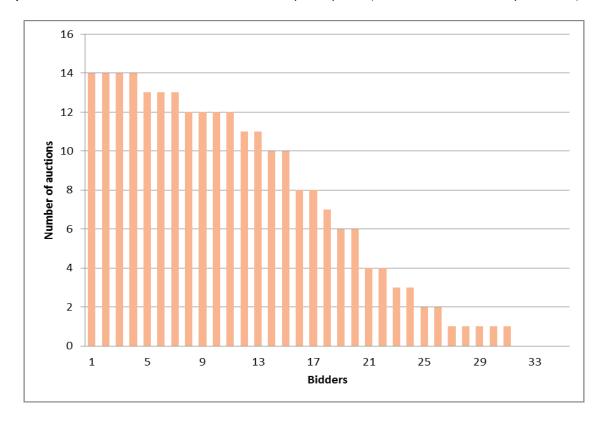

Graph 7 Number of bidders and number of successful bidders.

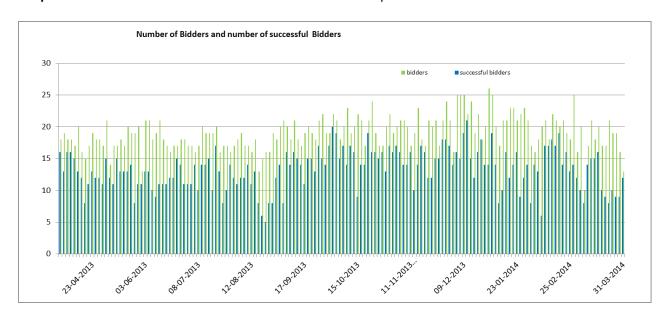

In total, 31 different bidders participated in the auction (see Graph 8). Four of them participated in all auctions during the reporting period. Eleven of them participated only in four or fewer auctions during the reporting period.

## March 2014

Graph 8 Number of auctions in which each bidder participated (bidders are identified by numbers).

**Graph 9** Number of bidders and successful bidders as from April 2013.

#### March 2014

#### Average bid volume per bidder and average volume won by successful bidders

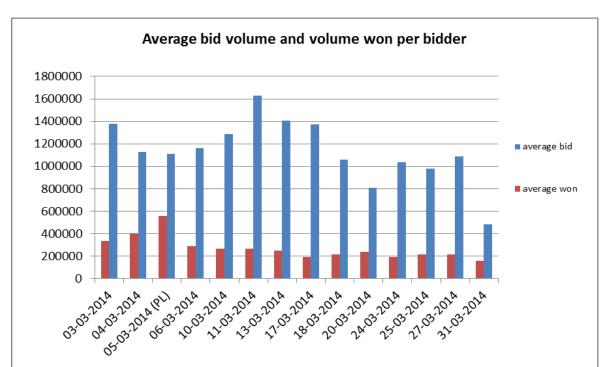

The average total bid volume per bidder per auction (see Graph 10) ranged from 483 308 to 1 627 944 EUAs during the reporting period. The average was 1 137 405, which is 36 % higher than the average in February 2014. The standard deviation of the average total bid volume per bidder for the individual auctions ranged from 668 374 to 2 490 076. Overall, the average bid volume per bidder did not show a clear upward or downward trend during the reporting period.

The average bid size ranged from 86 068 to 328 657 per auction, with an average of 216 747. This average was about 0.2% lower than during the previous reporting period. The average number of bids per bidder ranged from 3.68 to 7.44 per auction, with an average of 5.38.

The total volume of bids for the 14 auctions amounted to 280 163 000 EUAs. With 31 bidders during the month, this makes an average of the total bid per bidder over the entire month of 9 037 516 EUAs. The standard deviation calculated over the entire month is 16 209 283.

The average volume won by successful bidders for the individual auctions ranged from 160 625 to 555 625 EUAs. The standard deviation ranged from 154 023 to 850 619.

The average volume won by successful bidders did not show a clear upward or downward trend during the reporting period. The average for the period was 271 136 which is 13.6% lower than the average in February<sup>8</sup>.

**Graph 10** Average bid volume and volume won per bidder.

<sup>&</sup>lt;sup>8</sup> Compared to the previous period, the auction volumes were reduced as of 17 March 2014 in implementation of back-loading

#### March 2014

The total volume auctioned amounted to 42 048 500 EUAs. With 26 successful bidders during the month, this makes an average of successful bids per bidder over the entire month of 1 617 250 EUAs, which is 4.8% lower than the average in February 2014. The standard deviation calculated over the entire month is 2 291 083.

**Graph 11** Average bid volume and volume won per bidder as from April 2013.

## Volume of successful bids per bidder category

During the reporting period almost all bidders bid on their own account, with only about 0.10% of the volume submitted by intermediaries on behalf of a client. *Operators*, including business groupings of *operators*, accounted for about 57.6% of the total auctioned volume during the reporting period, compared to 56% in February 2014 (see Graph 12).

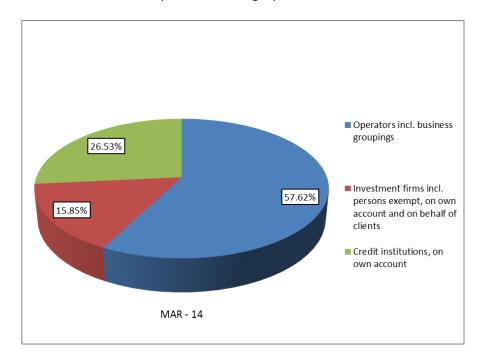

Investment firms, including *persons exempt*, accounted for about 15.8% of the total auctioned volume during the reporting period, compared to 13% in February 2014.

Credit institutions accounted for about 26.5% of the total auctioned volume during the reporting period, compared to 29% in February 2014.

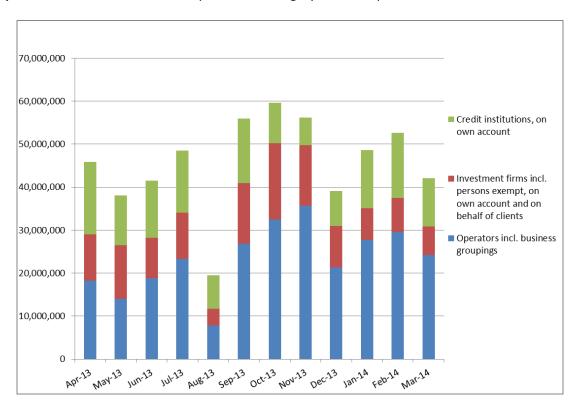

However, the shares of successful bids per category showed some relevant fluctuations over the period. The standard deviation of the shares was 16%, 7%, 16% and 2% for operators (including business groupings of operators), investment firms, credit institutions and persons exempt respectively.

## March 2014

**Graph 12**: Volume of successful bids per bidder category.

**Graph 13** Volume of successful bids per bidder category as from April 2013.

#### March 2014

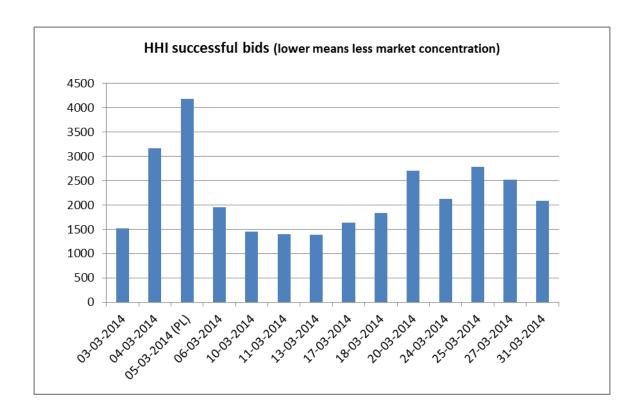

#### The Herfindahl-Hirschman Index (HHI)

The Herfindahl-Hirschman Index (HHI) is used by EEX to measure market concentration. The HHI is calculated as the sum of the squares of all successful bidders' shares (in %) of the total auctioned volume per auction. The HHI ranges from a value of 0 (perfect competition) to 10 000 (a single monopolistic buyer).

A common interpretation of the HHI is that a score below 1 500 is 'not-concentrated', between 1 500 and 2500 is 'moderately concentrated,' and above 2 500 is 'highly concentrated'.

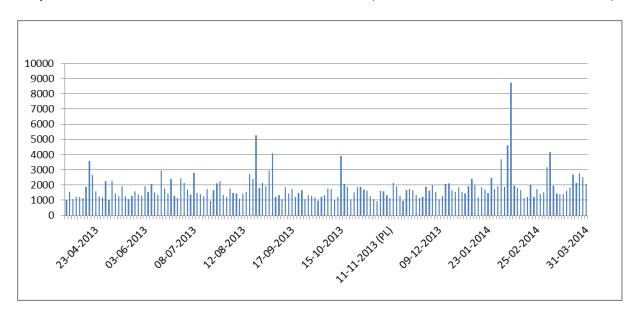

In general, the HHI moved between about 1 300 and 4 200 (see Graph 14) and the average HHI during the reporting period was 2 195. The HHI calculated as the sum of the squares of all successful bidders' shares (in %) of the total auctioned volume in the reporting period was 1 157.

Graph 14 Herfindahl-Hirschman Index.

#### March 2014

Graph 15 Herfindahl-Hirschman Index as from March 2013 (lower means less market concentration).

## Section 2. Implementation of and compliance with the applicable rules

## Fair and open access

EEX verified that each auction participant belonged to one of the categories of eligible bidders set out in Article 18 of the *Auctioning Regulation*. During the reporting period, the number of eligible bidders was 64. Most of the active participants in the carbon market are assumed to have been admitted to bid in the auctions.

Of the 64 companies eligible to bid in the auctions 43 were EU ETS operators, 10 were *investment* firms and 7 were *credit institutions* (see Table 5). The 4 other companies eligible to bid in the auctions were *persons exempt* from the authorisation requirements in EU financial law, because their trading and investment services activities are only ancillary to their main business (Article 2(1)(i) of Directive 2004/39/EC), that were authorised under national legislation implementing the Auctioning Regulation to bid for allowances in the auctions.

Throughout the period, EEX actively promoted the auctions in view of attracting bidders.

#### March 2014

Table 5 Eligible bidders per category at the end of the reporting period

Number of participants	Operators		Invest-	Credit	Business	Persons exempt	Total
	Stationary	Aircraft	ment	Insti-	groupings	From MiFID	
			firms	tutions		requirements	
						(Article 2(1)(i)	
						Directive	
						2004/39/EC)	
Participants admitted to EEX's							
emissions spot secondary market	-	-	-	-	-	-	116
Participants eligible to bid in	42	1	10	7	0	4	64
the auctions							
(Of which:) Participants eligible to bid	-	-	2	2	-	2	6
in the auctions on behalf of clients							
(Of which:) Auction-only participants	3	0	2	0	0	0	5

Five of the admitted participants made use of the option of 'auction-only access' to the auctions. Most bids were submitted by the bidder; only about 0.1% of the volume was submitted by intermediaries on behalf of a client.

No irregularities or deviations from the admission and access requirements were found.

#### **Transparency**

All auction results were published in accordance with Article 61 of the *Auctioning Regulation,* not later than 15 minutes after the close of the *bidding window*.

The auction calendar was adjusted in February 2014 and auctions with revised volumes as from 17 March 2014.

EEX revised its webpage on auctioning where necessary for keeping it up to date.

#### Technical and operational aspects

No irregularities or deviations from the requirements were found as regards the auctions themselves or the *clearing* and *settlement* processes.

EEX's Market Surveillance department surveyed all auctions with a view to detecting any *market abuse*, money laundering, terrorist financing or other criminal activities. No such wrongdoing was publicly reported. EEX's Market Surveillance department takes its instructions only from SMWA (Saxony's Ministry for Economy and Employment) and is independent of the exchange itself.

No infringements of the confidentiality requirements were identified.

#### Other aspects

No problems or issues were identified as regards coordination of the auctions between the various auction platforms.

March 2014

Section 3. Overview of, and any updates on breaches of provisions or ongoing

proceedings

No breaches or problems of non-conformity were reported. There were no proceedings on such

breaches or problems of non-conformity dating from before the reporting period.

Approval of the report

Comments of the auction platform on the draft of this report and the way they have been taken

into account

EEX made no comments on the report.

Comments by Poland on the draft of this report and the way they have been taken into account

Poland made no comments on the report.

platform pursuant to Article 30 of the Auctioning Regulation.

Persons exempt from the authorisation requirements in EU financial

law because their trading and investment services activities are only ancillary to their main business (Article 2(1)(i) of Directive 2004/39/EC) and that have been authorised under national legislation implementing the rules laid down in the *Auctioning Regulation* to bid for allowances in the auctions. See Article 18(2) of the *Auctioning* 

Regulation.

Secondary market Market in which persons buy or sell allowances either before or after

they are allocated either free of charge or through auctioning. To be distinguished from the 'primary market', which consists of the

auctions of allowances.

Settlement Payment on delivery of the allowances. See Article 3(34) of the

Auctioning Regulation.

Spot secondary market Secondary market for allowances with delivery within 5 days from the

transaction.

Stop-the-clock proposal Proposal by the Commission to exempt from enforcement flights into

and out of Europe operated in 2010, 2011, and 2012 to provide negotiation time for the ICAO General Assembly in autumn 2013. The  $\,$ 

proposal was adopted on 24 April 2013. See:

http://ec.europa.eu/clima/policies/transport/aviation/index\_en.htm

and OJ L115 of 25 April 2013, p.1.

TARGET-2 bank account

Bank account in the TARGET2 system, which is an interbank payment

system for real-time processing of cross-border transfers throughout the European Union. TARGET2 replaced TARGET (Trans-European Automated Real-time Gross Settlement Express Transfer System) in

November 2007.

# March 2014

Third trading period

The period 2013-2020. Allowances are valid during a given period without distinction as regards the year within that period. See Article 13 of the *ETS Directive*.
