

Delivering the EU contribution under the Paris Agreement

The implementation of the 2030 climate and energy framework

Side Event co-hosted by the European Commission
and the Florence School of Regulation

Time: 12 May 2017, 18:30-20:00

Venue: Room Berlin (112)

Following the entry into force of the Paris Agreement, the focus shifts to turning the national climate plans into concrete policies on the ground. The European Commission has put forward the majority of the proposals to deliver on the EU's nationally determined contribution and reduce domestic greenhouse gas emissions by at least 40% by 2030. The EU approach to enable the transition to a low carbon economy is through a wide range of interacting policies and instruments such as those implementing the European Energy Union Strategy.

We are pleased to invite you to participate in the side event focusing on how the Energy Union provides an integrated framework to lower emissions across all sectors of the economy with our speakers **Ms Eva Plocek-Kubesova** (Environment Attaché, Czech Republic), **Mr Henning Häder** (Eurelectric, Advisor), **Mr Artur Runge-Metzger** (European Commission, Director), and **Mr Claudio Marcantonini** (Florence School of Regulation - Climate, Deputy Director).

Mr Artur Runge-Metzger will hold an introductory presentation on the state of play in the implementation of the 2030 climate and energy framework. The debate will be moderated by **Mr Xavier Labandeira** (Florence School of Regulation - Climate, Director).

Refreshments will be served after the event
