Climate Change

AUSTRIA

March-April 2021

### 1. COUNTRY HIGHLIGHTS

In Austria, 15% of respondents (below the EU average of 18%) consider climate change to be the single most serious problem facing the world. Climate change now ranks second behind the spread of infectious diseases, down one place from its position as first most serious problem facing the world in 2019. In addition, close to seven in ten respondents (69%, below the EU average of 78%) think that climate change is a very serious problem.

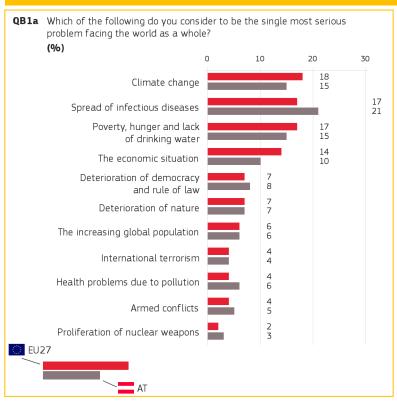

Two thirds of respondents in Austria (66%, compared with the EU average of 58%) say business and industry are responsible for tackling climate change, an increase of 18 percentage points since 2019. However, 48% of respondents (above the EU average of 41%) say they are personally responsible for tackling climate change, an increase of 15 percentage points. In addition, slightly more than seven in ten respondents (71%, above the EU average of 64%) say they have taken action to fight climate change in the past six months. This proportion increases to 96% (equal to the EU average) when asked to choose from a list of 15 possible actions to fight climate change. More specifically, respondents in Austria are more likely to buy and eat more organic food (48%, compared with the EU average of 32%).

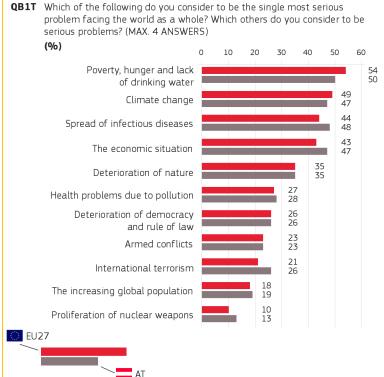

A large proportion of respondents in Austria agree that tackling climate change and environmental issues should be a priority to improve public health (80%, below the EU average of 87%). Slightly more than seven in ten respondents (71% vs the EU average of 74%) agree that the cost of the damage due to climate change is much higher than the cost of the investment needed for a green transition.

More than eight in ten respondents in Austria think it is important that both their national government (85% vs the EU average of 88%) and the European Union (82% vs the EU average of 87%) set ambitious targets to increase the amount of renewable energy used by 2030.

More than eight in ten respondents in Austria agree that greenhouse gas emissions should be reduced to a minimum while offsetting the remaining emissions in order to make the EU economy climate-neutral by 2050 (85%, just below the EU average of 90%). Finally, two thirds of respondents (67%, below the EU average of 75%) think that the money from the economic recovery plan should mainly be invested in the new green economy.
