* An update will be made available when new information from Member States is available. Changes in the table compared to the last update are highlighted in blue.

** For Cyprus, the decision of 8 April 2014 validated the national allocation table for the entire period 2013-2020; no further decision is required

*** Earliest date that allocation is possible, the final date is determined by the Member State.

**** The number of free allowances requested listed in this table can include allowances issued with a delay for previous years. In this case, the relevant amounts per year are reflected in the EUTL.

Context:

Eight Member States have made use of the derogation from full auctioning for the modernisation of the power sector and are allowed to allocate free allowances on this basis for a transitional period ending in 2019.

Before such allocations can take place, Member States must submit a corresponding NAT. According to the national rules for the implementation of the derogation, this may in some cases require reporting on whether investments set out in a national plan and justifying the allocation have actually been carried out.

Member States may also allocate less allowances than the maximum allowed pursuant to their applications and approved by the respective Commission decisions. Depending on the relevant provisions in each of the eight Member States, the difference may be allocated for free in the coming year(s). All allowances not allocated for free will be auctioned.
